### **Recommended Application Wiring Diagram**

#### Control

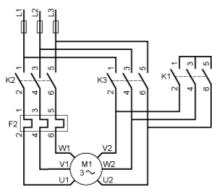

WARNING
UNEXPECTED EQUIPMENT OPERATION
No galvanic isolation between supply terminals A1, A2, B1, B2 and supply terminal Z2.
Failure to follow these instructions can result in death, serious injury, or equipment damage.
Star-Delta function with double On-delay timing Qt.

Product data sheet Performance Curves

# RE7YA12BU

### **Performance Curves**

### A.C. Load Curve 1

Electrical durability of contacts on resistive loading millions of operating cycles

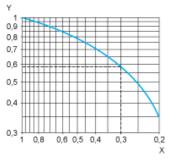

#### Х Current broken in A

Y Millions of operating cycles

### A.C. Load Curve 2

Reduction factor k for inductive loads (applies to values taken from durability curve 1).

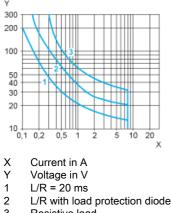

Х Power factor on breaking (cos  $\phi$ )

#### Υ Reduction factor k

Example: An LC1-F185 contactor supplied with 115 V/50 Hz for a consumption of 55 VA or a current consumption equal to 0.1 A and cos φ = 0.3. For 0.1 A, curve 1 indicates a durability of approximately 1.5 million operating cycles. As the load is inductive, it is necessary to apply a reduction coefficient k to this number of cycles as indicated by curve 2. For  $\cos \phi = 0.3$ : k = 0.6 The electrical durability therefore becomes:  $1.5 \ 10^6$  operating cycles x  $0.6 = 900 \ 000$  operating cycles.

### D. C. Load Limit Curve
