

Fuse Disconnect Terminal Blocks with Pivoting Fuse Holder, for Miniature Metric Fuses, 281 Series

Blown fuse indication

Blown fuse indication by LED or neon lamp.

Fuse replacement

Before replacing the fuse, pivot the fuse holder in the locked open position.

One end of the fuse is automatically ejected from the holder when opening the cover.

CAGE CLAMP® connection

Conductor termination

Commoning

Distribution of current to several fuse-protected circuits via insulated touchproof jumpers.

Testing

Voltage test, either at input or output with fuse holder in closed position (live).

Through test with fuse holder in open position (no voltage).

Voltage test at input in the test slot of the current bar.

CAGE CLAMP® clamps the following copper conductors:*

solid

stranded

fine-stranded, also with tinned single strands

* For aluminum conductors, see notes in Section 14.

- Description and Handling -

Fuse replacement (continued)

The fuse can be easily removed by hand.

Insert new fuse snap the cover closed.

Spare fuse

Storage of spare fuse (fuse holder without blown fuse indication).

Touchproof protection

"Touchproof" protection in all positions of the fuse holder.

Locked position

Fuse holder will remain safely locked open in vertical assemblies.

Testing (continued)

Testing voltage at the output via separate test slot.

Current measuring between jumper slot and separate test slot.

Voltage testing at input via 280-404 test plug adapter (shown) or 281-407 test plug.

fine-stranded,
tip-bonded

fine-stranded,
with pin terminal
(gastight crimped)

① When using ferrules, the max. conductor cross section accommodated is one size smaller than max. rating of terminal block.

A spacer is standard equipment for 10 mm/0.394 in wide fuse terminal blocks. At the end of an assembly, or if there is **no** adjacent fuse terminal block, an end or intermediate plate must be used.

Two marker slots each per fuse holder are available for individual WMB Multi marking. (example: 8 mm/0.315 in terminal blocks).

Ganging several fuse holders with a connecting strip (example: 8 mm/0.315 in terminal blocks).

- ❶ 800 V = rated voltage
8 kV = rated surge voltage
3 = pollution degree
(also see Section 14)
- ❷ Electrical ratings are given by the fuse
(also see pages 234 – 235).
- ❸ Strip length, see packaging or instructions.
