

Fixing

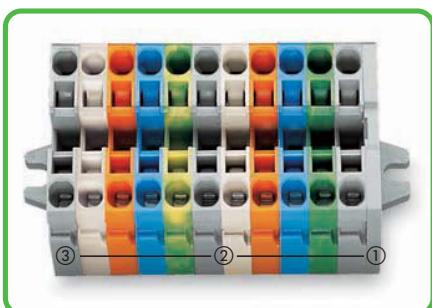

Terminal strip with fixing flanges, screw mount.

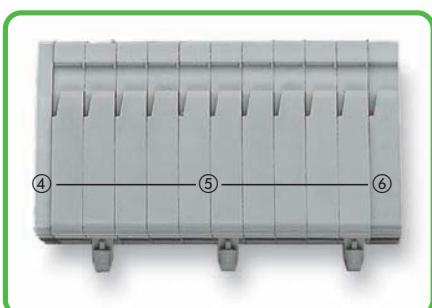

Terminal strip with snap-in mounting feet, mounting in holes.

Terminal strip with snap-in mounting feet, mounting onto special aluminum rail.

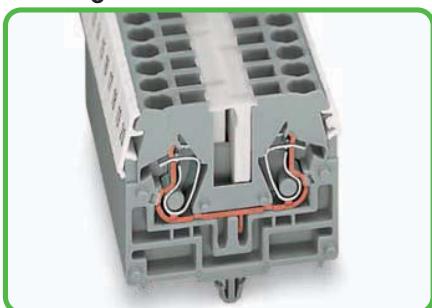

Terminal strip with fixing flanges, consisting of:
End plate with fixing flange ①
Center terminal blocks ②
End terminal block with fixing flange ③

Terminal strip with mounting feet, consisting of:
End plate ④ / Center terminal blocks with/without snap-in mounting feet ⑤ / End terminal block with/without snap-in mounting foot ⑥

Marking

WAGO WMB Multi marking system or WAGO miniatur WSB Quick marking system.

Push jumper bars down firmly until fully inserted! When using multipole bars, push alternately on right and then left side, until installed.

Push-in type jumper bar system

CAGE CLAMP®
clamps the following
copper conductors:*

solid stranded

fine-stranded,
also with tinned
single strands

fine-stranded,
tip-bonded

fine-stranded,
with ferrule ①
(gastight crimped)

fine-stranded,
with pin terminal
(gaslight crimped)

* For aluminum conductors, see notes in Section 14.

① When using ferrules, the max. conductor cross section accommodated is one size smaller than max. rating of terminal block.

Compact Terminal Strips 2.5 mm² (4 mm² "f-st") with Fixing Flanges or Snap-in Mounting Feet 869 Series

Terminal strips with snap-in mounting feet,
for plate thickness 0.6 - 1.2 mm (0.02 - 0.047 in),
fixing hole 3.5 +0,1 mm Ø

Insert insulation stop into conductor entry holes of terminal strip.

Protective warning markers (280-405), with black high-voltage symbols.

Wiring programmable logic controllers and microprocessor-operated control circuits often relies on very small cross sections of fine-stranded conductors. These small conductors are highly flexible, and they deform when pushed against the conductor stop in terminal blocks. As a result, the conductor insulation – not the copper conductor – may be clamped, causing intermittent contact or no contact at all. Common to all terminal block types currently offered, this problem creates unnecessary downtime for troubleshooting.

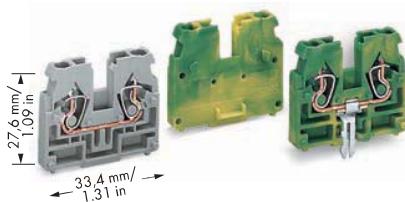

The solution: an insulation stop for compact terminal blocks. Insulation stops automatically bundle the cores of fine-stranded conductors when inserted into the clamping unit, preventing splaying. This also limits the conductor entry to a defined cross sectional area – ensuring the actual conductor, not the insulation, will enter the clamping unit.

The insulation stop is available as dividable 5-pole strip for the 869 Series terminal strips.

Insulation stop usage will not affect the conductor strip lengths for the aforementioned terminal strips.
