## Fuse Disconnect Terminal Blocks with Pivoting Fuse Holder, for Miniature Metric Fuses, 281 Series

### Blown fuse indication

Blown fuse indication by LED or neon lamp.

## **Fuse replacement**

Before replacing the fuse, pivot the fuse holder in the locked open position.

One end of the fuse is automatically ejected from the holder when opening the cover.

### **CAGE CLAMP®** connection

Conductor termination

## Commoning

Distribution of current to several fuse-protected circuits via insulated touchproof jumpers.

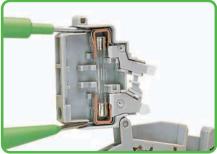

### **Testing**

Voltage test, either at input or output with fuse holder in closed position (live).

Through test with fuse holder in open position (no volta-

Voltage test at input in the test slot of the current bar.

fine-stranded, also with tinned single strands

## CAGE CLAMP®

### Fuse replacement (continued)

The fuse can be easily removed by hand.

Insert new fuse snap the cover closed.

### Spare fuse

Storage of spare fuse (fuse holder without blown fuse indication).

### **Touchproof protection**

"Touchproof" protection in all positions of the fuse holder.

### Locked position

Fuse holder will remain safely locked open in vertical assemblies.

### Testing (continued)

Testing voltage at the output via separate test slot.

Current measuring between jumper slot and separate test

Voltage testing at input via 280-404 test plug adapter (shown) or 281-407 test plug.

# Technical Information and Accessories

- 800 V = rated voltage 8 kV = rated surge voltage 3 = pollution degree (also see Section 14)
- 2 Electrical ratings are given by the fuse (also see pages 234 235).
- 3 Strip length, see packaging or instructions.

A spacer is standard equipment for 10 mm/0.394 in wide fuse terminal blocks. At the end of an assembly, or if there is **no** adjacent fuse terminal block, an end or intermediate plate must be used.

Two marker slots each per fuse holder are available for individual WMB Multi marking. (example: 8 mm/0.315 in terminal blocks).

Ganging several fuse holders with a connecting strip (example: 8 mm/0.315 in terminal blocks).
