

## Compact Rail-Mounted Terminal Blocks for DIN 15 and DIN 35 Rails 870 Series

### Assembly

Snapping a rail-mount terminal block onto DIN 35 carrier rail.

### Removal

Removing a terminal block from the assembly.

### Insulation stop

Inserting an insulation stop.

### Push-in type jumper bar system

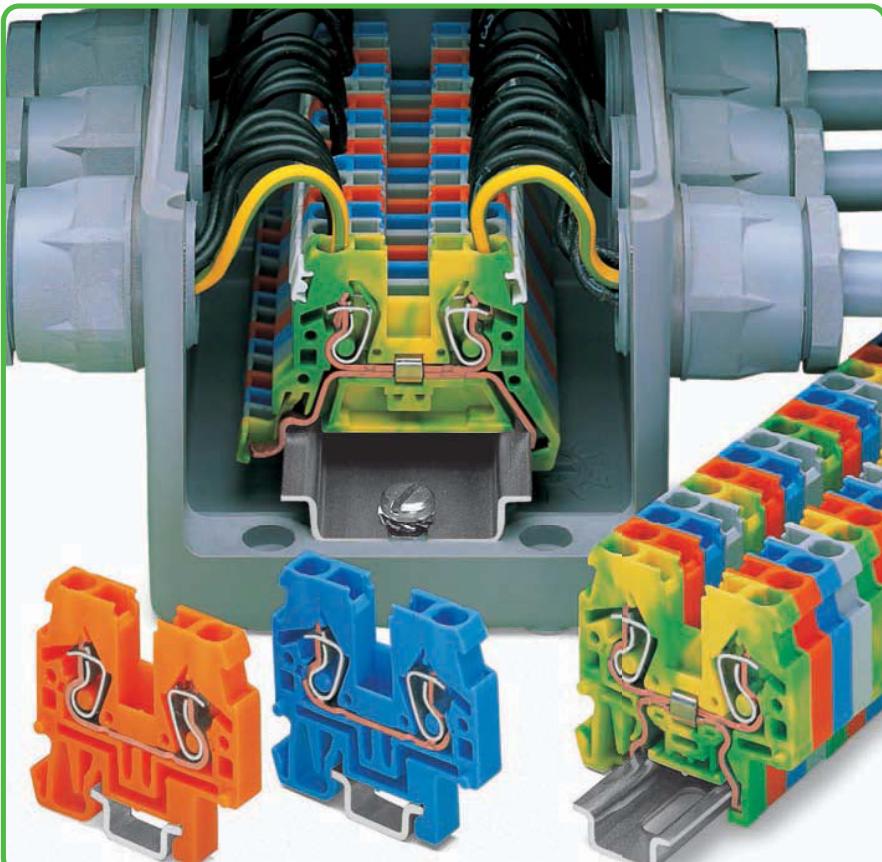

Push jumper bars down firmly until fully inserted. When using multipole bars, push alternately on right and then left side, until installed.

Push-in type jumper bars 1 - 3 - 5 - 7 or 1 - - 4 - - 7 upon request.

### Push-in type jumper bar system

Two parallel jumper receptacles are accommodated in one terminal block.

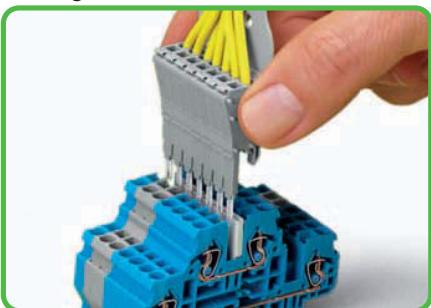

### Commoning with step-down jumpers

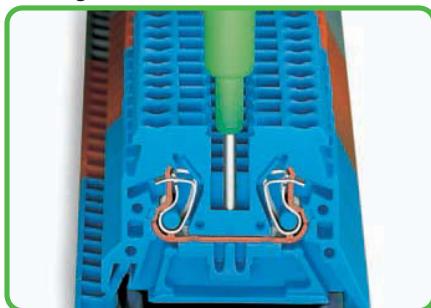

Commoning terminal blocks of different sizes – step down.

### Testing

Testing is also possible using a pre-wired module assembly, similar to test plugs.

### Testing

Testing with phase testing device, also possible with single-pole voltage tester.

**CAGE CLAMP®**  
clamps the following  
copper conductors:<sup>\*</sup>

solid

stranded

fine-stranded,  
also with tinned  
single strands

\* For aluminum conductors, see notes in Section 14.

① When using ferrules, the max. conductor cross section accommodated is one size smaller than max. rating of terminal block.

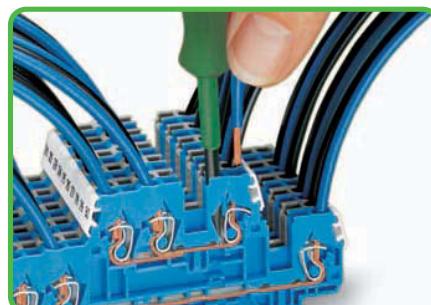

## - Description and Handling -

### CAGE CLAMP® connection

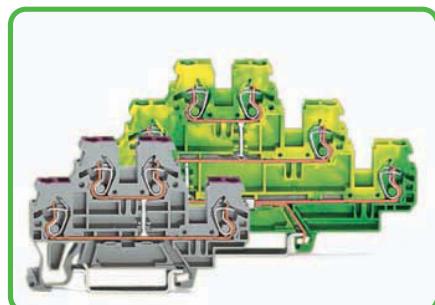

Terminating fine-stranded conductors ranging from 0.08 to 4 mm<sup>2</sup> (AWG 28 – 12).

### CAGE CLAMP® connection

### Multilevel terminal blocks

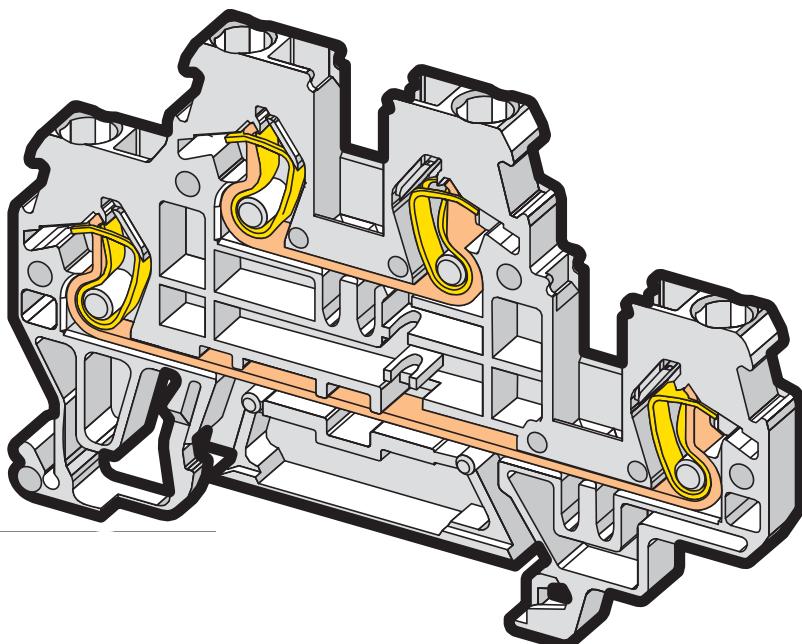

Double- and triple-deck terminal blocks with internal comming acting as 4- and 6-conductor terminal blocks.

### Protective warning marker

Protective warning markers (280-405), with black high-voltage symbols.

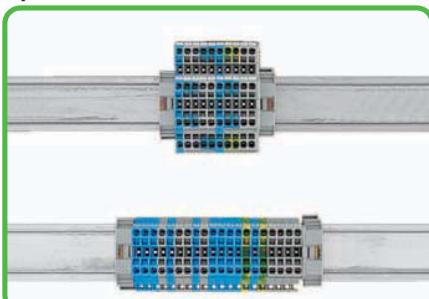

### Marking

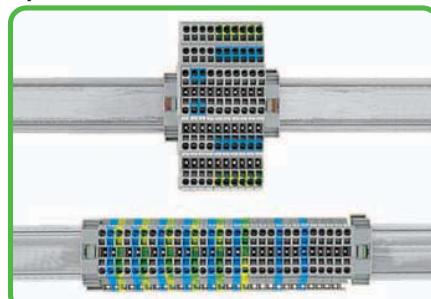

Marking the clamping unit via WMB Multi marking system or miniature WSB Quick marking system.

### Space saver

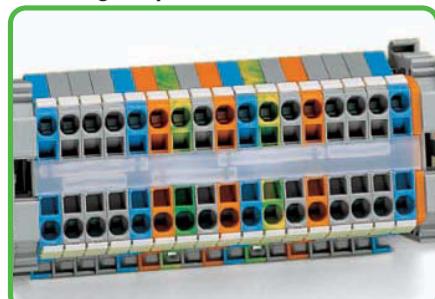

Save 50% of rail space when using double-deck terminal blocks.

### Space saver

Save 67% of rail space when using triple-deck terminal blocks.

### Marking Strips

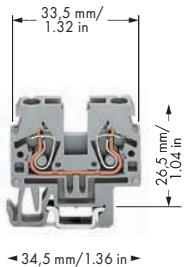

Transparent marker strips (note: Jumpers below may be visible).

fine-stranded,  
tip-bonded

fine-stranded,  
with ferrule ①

fine-stranded,  
with pin terminal  
(gastight crimped)

0.08 - 2.5 (4" f-st") mm <sup>2</sup>	① AWG 28 - 12
500 V/6 kV/3	② 300 V, 20 A <sub>c</sub> ③
I <sub>n</sub> 24 A	
Terminal block width 5 mm / 0.197 in	
6 - 7 mm / 0.26 in ④	

**Assembly:**  
Snap individual terminal blocks onto DIN 15 carrier rail and slide together.  
**Removal:**  
Open assembly by laterally sliding terminal blocks with an operating tool and remove them from the rail.

① Max. insulation diameter: 4.4 mm

② 500 V = rated voltage  
6 kV = rated surge voltage  
3 = pollution degree  
(also see Section 14)

③ Strip length, see packaging or instructions.

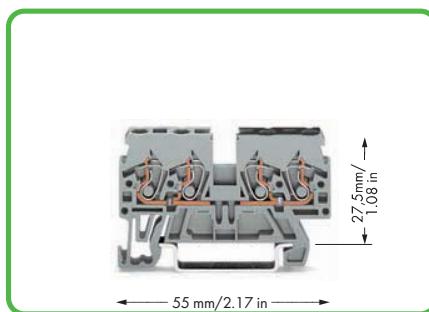

④ Suitable for Ex i applications

⑤ Suitable for Ex e II applications  
0.2 mm<sup>2</sup> - 2.5 (4 "f-st") mm<sup>2</sup>/AWG 24 - 12  
440 V, 22 A

Using push-in type jumper bars 1 to X, the maximum rated voltage is reduced to 275 V and the rated current to 13.5 A  
(also see Section 14)

Packing unit: 100 pcs

**Notice:** This double-potential terminal block cannot be commoned with push-in type jumper bars!

For technical data and accessories,  
see [www.wagocatalog.com](http://www.wagocatalog.com)

Protective warning markers inserted into the operating slots.

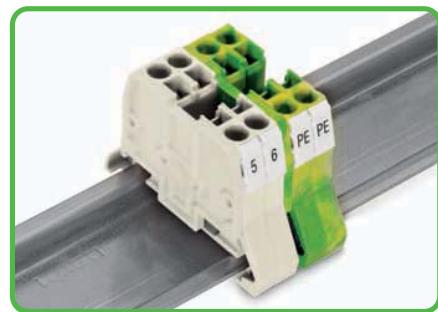

Miniature WSB or WMB markers provide marking directly on terminal block.

WAGO front-entry double-potential terminal blocks are space savers.

Two independent feedthrough circuits are placed in one insulated housing on one level in just 5 mm/0.197 in. This achieves a width of just 2.5 mm/0.098 in is achieved versus standard through terminal blocks for a total height of only 27.5 mm/1.08 in from the upper edge of the carrier rail.

Input and output contacts of one circuit are placed on the same side of the terminal block. Both circuits can be individually marked according to input and output.

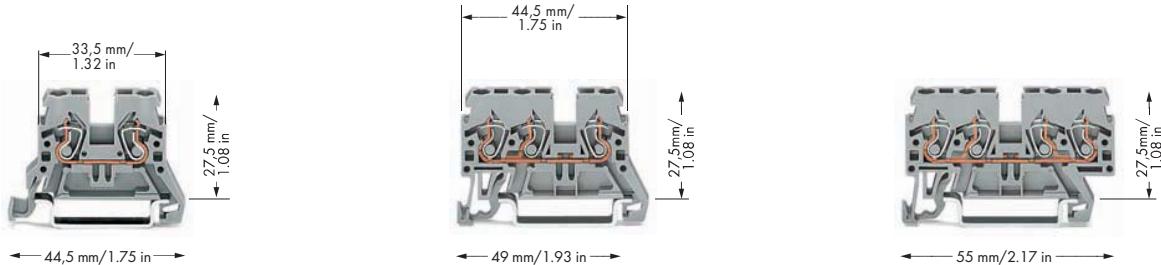

In order to meet creepage and clearance requirements for Ex e applications, it is necessary to insert an end or intermediate plate between a through and a ground conductor terminal block.  
End plates 870-923 (gray), 870-924 (orange) and 870-925 (light gray), as well as separator plates 870-928 (gray) and 870-929 (orange) cannot be assembled to 870-907/999-950 2-conductor ground Ex terminal blocks.
