NS, the HMI brand you can rely on

Machine Control at Your Fingertips. On-screen Machine Management.

Expanding markets in emerging countries, short product cycles, and diversifying customer needs are just some of the factors that create drastic changes for the production industry.

To win in severe global market competition, you have to continue to grasp industry changes quickly, understand user needs accurately, and provide diverse forms of added value.

OMRON will help you handle ever-changing customer needs with the three keywords of the NS Series.

Let Your Machines Evolve

Best Match

OMRON has provided even greater compatibility with OMRON PLCs and components to provide an advanced design process that lets you achieve appealing machines.

Machine Management

The NS Series transforms machine HMIs from simple operation panels and turns them into machine management tools.

Proven Reliability

The NS-series PTs have a proven track record that will take your machines to a higher level of reliability.

NS

Series

The Best Match Possible

The amount of work and cost of connecting to OMRON PLCs and components have been greatly reduced. The results is an incredible range of features that is possible only when unifying to one manufacturer. Connecting to the NJ-series Machine Automation Controller allows the machine designer to quickly achieve the features required by the user through support for improved troubleshooting and structured programming with structures and other new data types.

Machine Management Tool

The machine designer can easily implement PLC troubleshooting, machine troubleshooting, settings for servo drives, temperature controllers, and other control components, status monitoring of connected devices, and uploading/downloading of parameters.

Proven Reliability

In the ten years since initial marketing, OMRON has globally supplied numerous HMI solutions with the highly reliable NS Series at over 200 sales and service centers around the world.

NS Series Lineup

This powerful lineup showcases OMRON's unique value.

Choose from 3 types to match your application and requirements.

NS Series

Standard Models

Plentiful screen variations and diverse functions allow use in a wide variety of applications.

15 inches **Color TFT**

NS15-TX

- || 32,768 colors
- || XGA 1024 x 768 pixels
- || Screen memory size: 60 MB
- USB Slave Controller Link
- Ethernet Video (RGB input only)
- USB Master RGB output
- RS-232C x 2 Ladder Monitor
- RS-422A/485 Memory Card

12.1 inches **Color TFT**

NS12-TS

Software

CX-Designer

Without screen creation and ladder programming, the CX-Designer Screen Design Software is so easy-to-use that anyone can master it.

NS-Runtime

This software enables PLC communications from a personal computer by manipulating PT screens created using the CX-Designer.

A Revolutionary Best Ma

The NS-series PTs provide revolutionary compatibility with the road-proven CS/CJ-series the new NJ-series Controllers to achieve even greater added value in user machines.

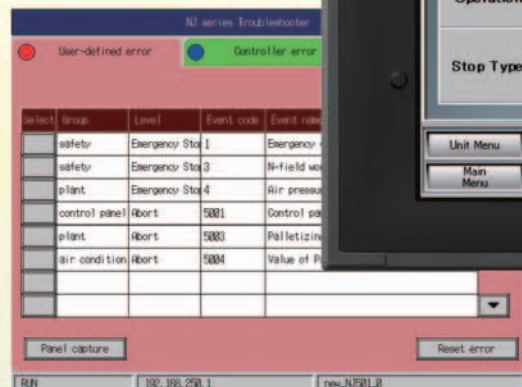

The NJ-series Machine Automation Controllers Revolutionize Productivity

You can create a flexible, high-speed, high-precision system based on the NJ-series Machine Automation Controllers. Use tags to access any memory areas, or troubleshoot machines and systems by using the NS-series PTs to make the most of the strengths of the NJ-series Controllers and to manage machines.

EtherNet/IP

EtherCAT

The CS/CJ-series PLCs for the Reliability of a Proven Track Record

Features are provided to easily connect to CS/CJ-series PLCs to take advantage of their proven track record.

Many features that do not require screen creation or programming support everything from design through maintenance to take advantage of the compatibility of OMRON PLCs and PT and to serve as the face of your machines.

CS/CJ

Power Support for All User

Design

Troubleshooter

A Troubleshooter is provided for the connected OMRON Controller or PLC. This greatly reduces work requirements.

NJ Troubleshooter

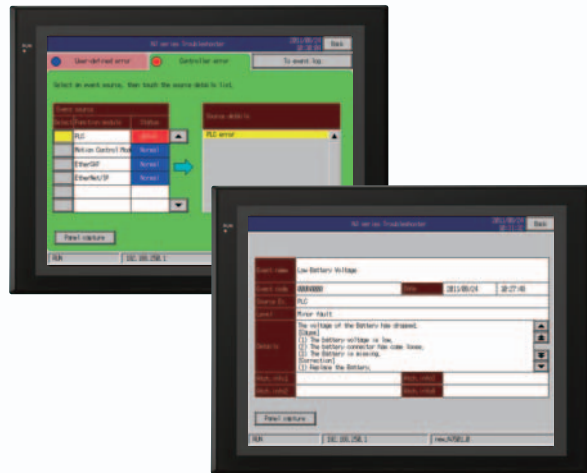

Controller Errors

Standard Feature for NJ-series Controllers

Errors are automatically detected and displayed on-screen along with corrective actions for the CPU Unit function modules, EtherCAT slaves, and CJ-series Units that are connected in the NJ-series Controller. Whenever an error might occur, you can recover normal operation quickly to reduce downtime without using user manuals or Support Software on a computer.

NJ Controller

User-defined Errors

No Work Is Required to Create Alarm Screens.

Frames for alarm screens are provided as standard features in the NS-series PTs. You do not need to create screens to complete alarm screens.

Management of the meanings of alarms is unified on the Controller, so you do not have to register, add, or correct addresses on the NS-series PTs.

No screen creation is required

Excel
Alarm Specifications

Copy and Paste

Sysmac Studio

Transfer

Alarm Registration and Programming Detection Conditions

NJ Controller

Unified Alarm Definitions

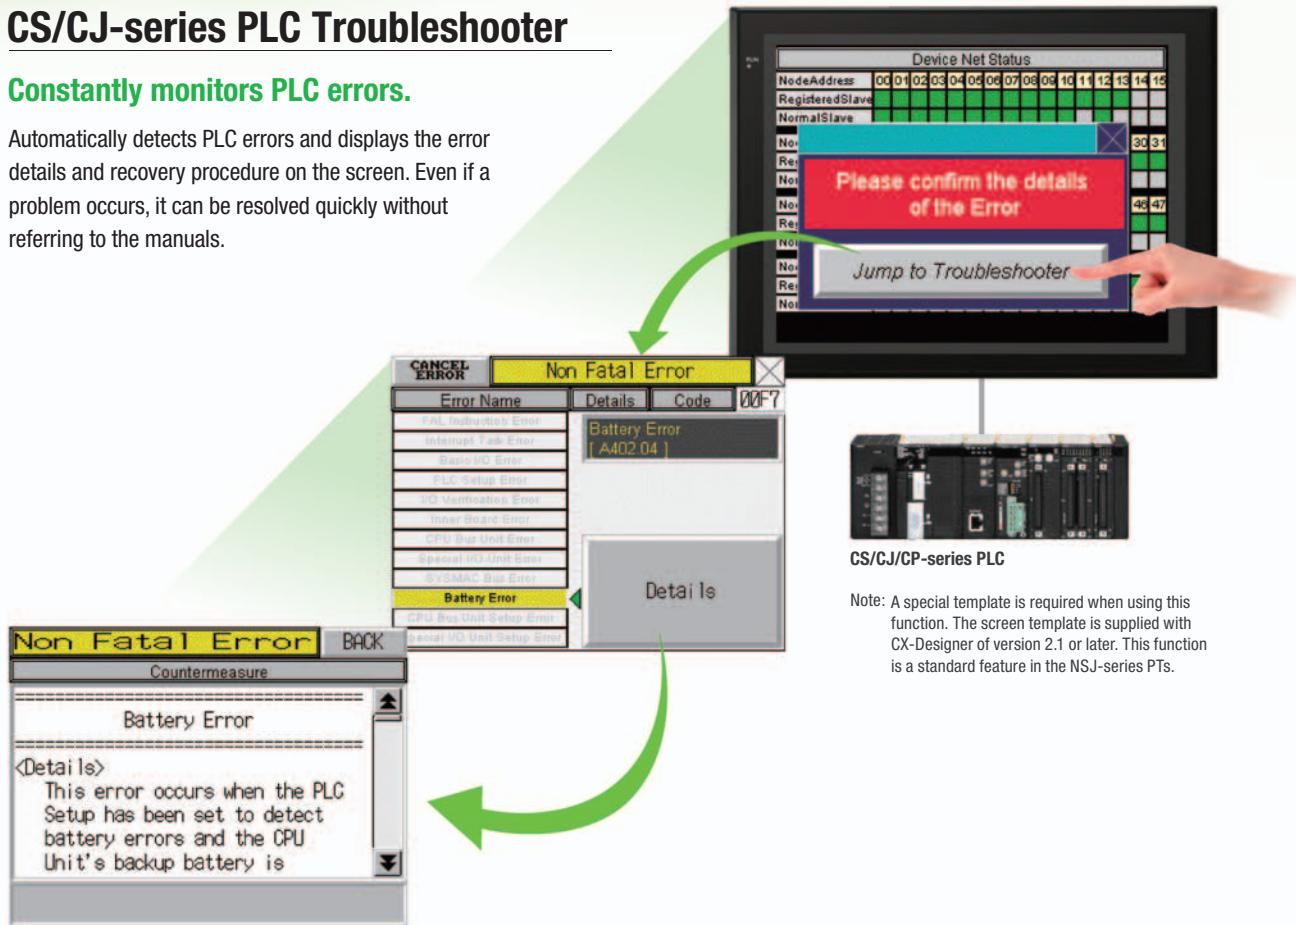

Alarms displayed.

CS/CJ-series PLC Troubleshooter

Constantly monitors PLC errors.

Automatically detects PLC errors and displays the error details and recovery procedure on the screen. Even if a problem occurs, it can be resolved quickly without referring to the manuals.

CS/CJ/CP-series PLC

Note: A special template is required when using this function. The screen template is supplied with CX-Designer of version 2.1 or later. This function is a standard feature in the NSJ-series PTs.

Machine Troubleshooter

Easier Design of Machine Error Screens

Individual error screens that were previously made for each error can now be integrated into one. It is possible to switch only the error details (text and screen) without ladder programming in conjunction with the alarm bit.

With this system, this frame is shared, and the error details in the pink frames are switched with an alarm or other item as the trigger.

Specific Example

in conjunction with an alarm bit (See note.)

Alarm bit 10.01 ON (no paper)

Text selection

Counter measure

Please draw out tray 1 forward. Please set a new paper in the direction like photo. Please the paper diagonally must not be set or not use the distorted paper, and the paper blocking might not be generated and not use.

Image selection

Alarm bit 10.02 ON (printing error)

Text selection

Counter measure

The dirt of the reading part is thought. Please clean the reading part glass by using alcohol and the cotton waste in the maintenance box. Please exchange the reading units when not improving it even if it cleans it.

Image selection

Note: Alarms, PLC/PT memory, and other items can be selected for the switching trigger.

Design

Best Match with OMRON Products

NS Series is the most suitable HMI for the system that comprises OMRON components. The advantage is the "compatibility (reducing programming and screen data creation work)" which will reduce the amount of designing work.

NS

No Screen Designing / No Programming

- 260,000-color video input

Temperature Controllers

Servomotor Servo Driver

Smart Active Parts (SAP Library)

Dramatically reduces the effort required to create ladder programming and screens.

More than 3,000 Library parts (Smart Active Parts) are available, which can directly access OMRON PLCs and components. The objects can just be pasted from the Smart Active Parts (SAP Library) Library to the screen; it is completely unnecessary to create screens and ladder programming.

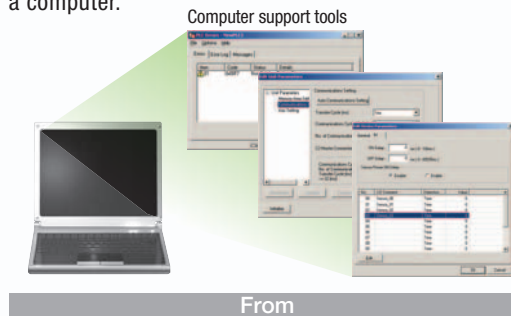

The Temperature Controller's setting and monitor screens are completed in no time.

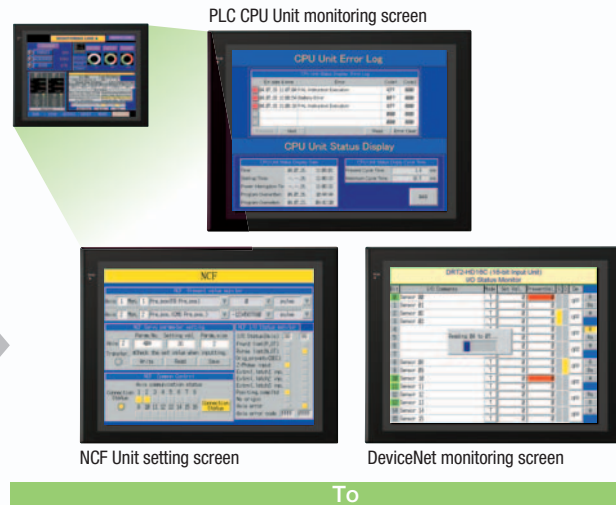

Support tool objects can be incorporated to check for errors and make settings, even without a computer.

Plenty of support tool objects (the Tool Function SAP Library) are available, which can be easily incorporate support tool functions in the NS-series PT. Just paste the support tool objects in the screen to check for errors and make settings, even without a computer.

Example screens using support tool objects (Tool Function SAP Library)

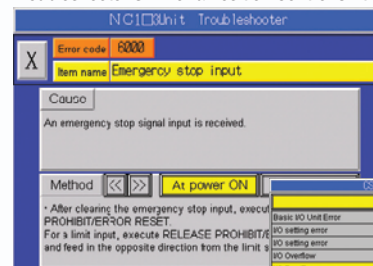

CPU Bus Unit and Special I/O Unit Troubleshooting Can Be Also Performed with the SAP Library.

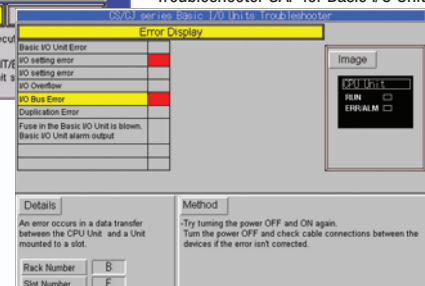

A Troubleshooter SAP Library is available to troubleshoot each Unit in the PLC. When an error occurs in a Unit, the Troubleshooter SAP Library provides an easy-to-understand explanation of the cause of the error as well as the countermeasures.

Note: The Troubleshooter SAP Library is included as a standard feature for the CX-One and CX-Designer. For details, refer to page 56. Successive development for Ethernet Units and MC Units is planned for the future.

Troubleshooter SAP for a Position Control Unit

Troubleshooter SAP for Basic I/O Unit

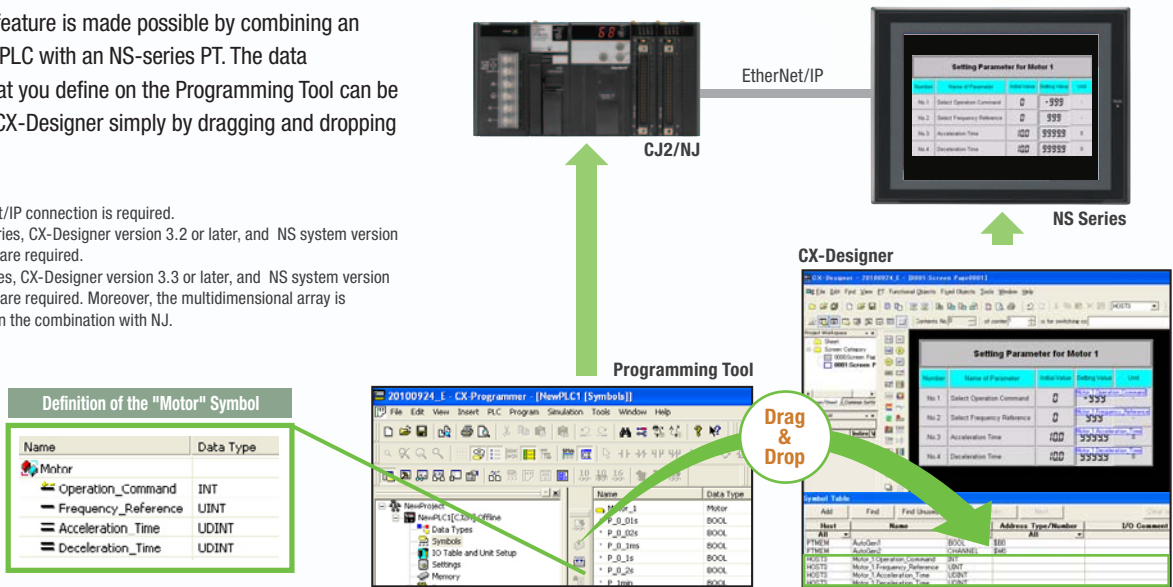

Design

EtherNet/IP

Support for data structures

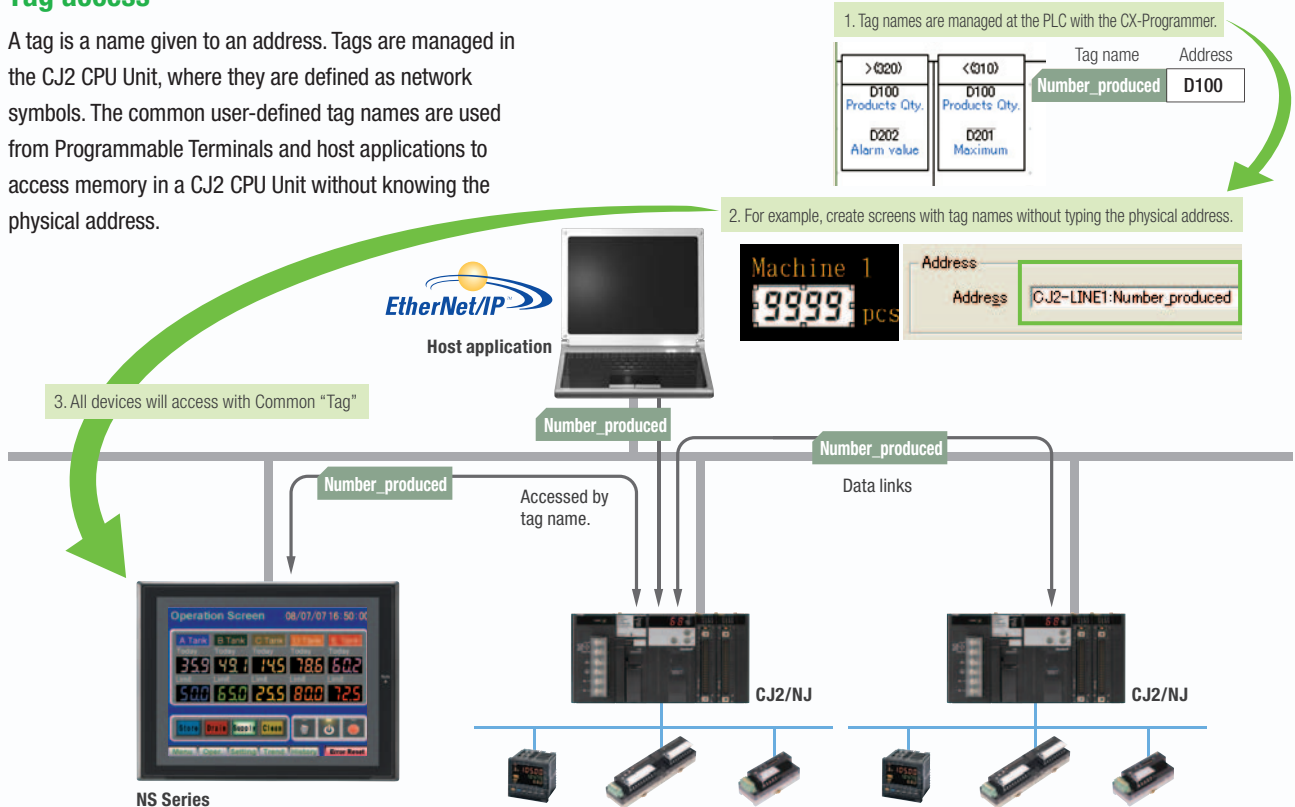

This special feature is made possible by combining an OMRON CJ2 PLC with an NS-series PT. The data structures that you define on the Programming Tool can be used on the CX-Designer simply by dragging and dropping them.

Note: An EtherNet/IP connection is required.
 For CJ2 Series, CX-Designer version 3.2 or later, and NS system version 8.4 or later are required.
 For NJ Series, CX-Designer version 3.3 or later, and NS system version 8.5 or later are required. Moreover, the multidimensional array is supported in the combination with NJ.

Tag access

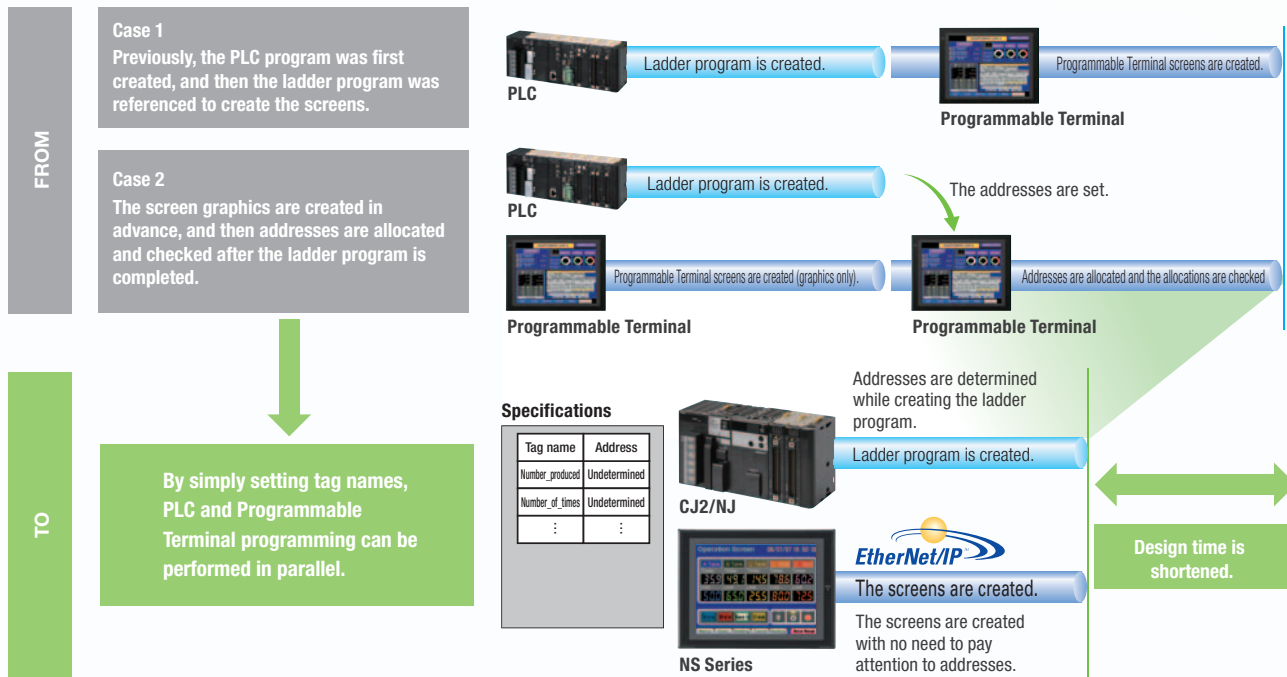

A tag is a name given to an address. Tags are managed in the CJ2 CPU Unit, where they are defined as network symbols. The common user-defined tag names are used from Programmable Terminals and host applications to access memory in a CJ2 CPU Unit without knowing the physical address.

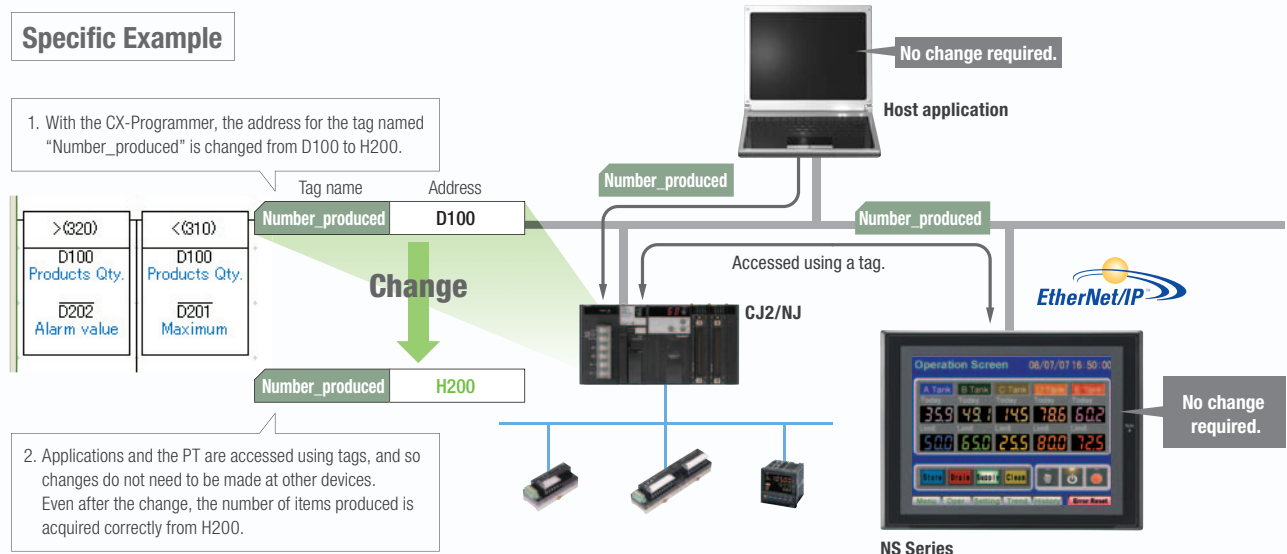

Simultaneous and parallel engineering

The host applications can be designed using the tag names of the PLC and PT. Parallel development will shorten the design time.

Minimize side effect of address changes

It is possible to access memory with tags, so the PT and host application are not affected even if the address of data in the PLC is changed.

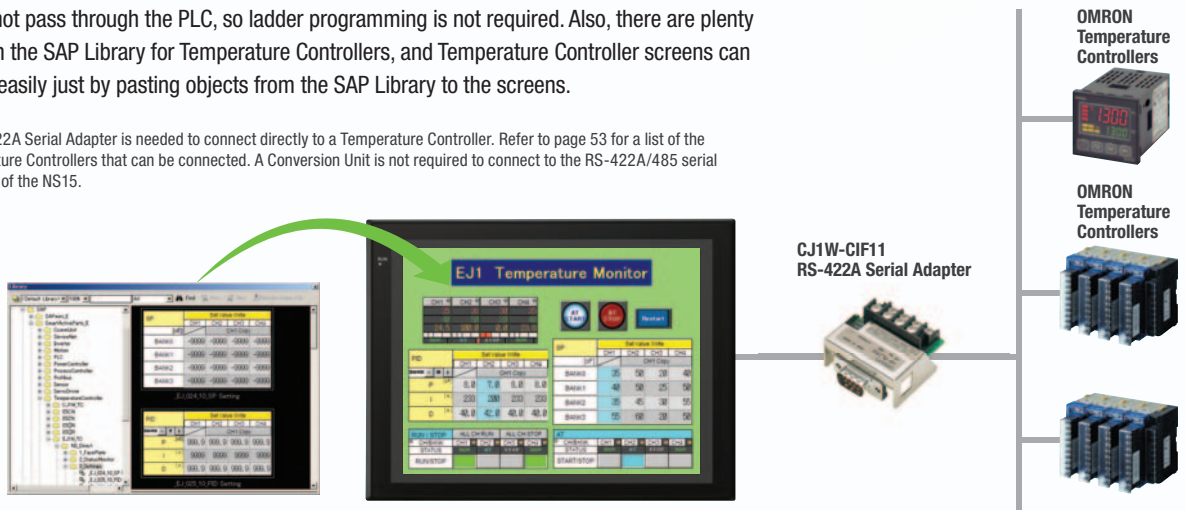

Direct Connection to Temperature Controllers

Connect OMRON Temperature Controllers directly to the NS-series PT.

OMRON Temperature Controllers can be connected directly to the NS-series PT's RS-232C port. Data does not pass through the PLC, so ladder programming is not required. Also, there are plenty of objects in the SAP Library for Temperature Controllers, and Temperature Controller screens can be created easily just by pasting objects from the SAP Library to the screens.

Note: An RS-422A Serial Adapter is needed to connect directly to a Temperature Controller. Refer to page 53 for a list of the Temperature Controllers that can be connected. A Conversion Unit is not required to connect to the RS-422A/485 serial interface of the NS15.

Face Plate Auto-Builder for NS

Screens for Loop Controllers can be easily and automatically created.

Significantly reduces the effort required to combine a Loop Controller with an NS-series PT.

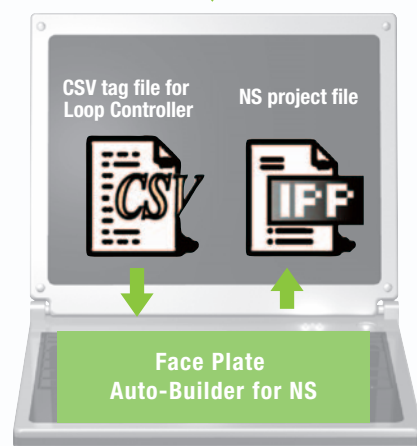

Easy automatic generation of faceplates, such as faceplates for PV monitoring and SV setting, as well as tuning screens, such as screens to set and autotune PID constants.

A total of 17 function blocks are supported, with eleven function blocks, such as Ratio Setting and Motor Manipulators newly supported (version 3 of higher).

Comments are automatically entered for automatically assigned unit and scale settings when a project is generated (version 3 and higher).

CX-Process Tool
(Loop Controller Programming Software)
● Loop Controller program creation (function block method)
● CSV tag file output

CX-Designer
(NS screen creation software)
● Editing created data
● Creation of other required screens

Created screens are easily transferred to the NS by using a Memory Card or over the network.

Note: Refer to the PLC-based Process Control Catalog (Cat. No. P051) and the Loop-control CPU Unit Catalog (Cat. No. R128) for details on Loop Controllers.

Multi-language Support

Support 42 languages and switch the language of the labels among up to 16 languages.

Unicode is supported and 42 Asian and European languages can be combined in screens. Also, it is possible to switch between up to 16 labels using the label switching function, so it is possible to support up to 16 languages in a single screen just by specifying the language to be displayed in each label.

NS Series

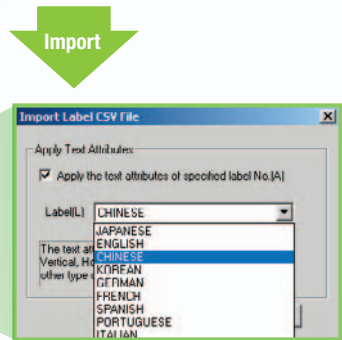

Multi-language CSV data

Label	Chinese	Japanese	English
Setting Screen	設定画面	設定画面	Displaying the Screen
Monitoring Value	監視値表示	監視値表示	Overarching the Home
TARGET	目標値	目標値	ZEL
ALARM MAX	警報上限値	警報上限値	WARNING MAXIMUM
ALARM MIN	警報下限値	警報下限値	WARNING MINUTE
OPERATION QUANTITY	稼働数量設定	稼働数量設定	SET POINT QUANTITY
MANUAL OPERATION	手動稼働数量	手動稼働数量	HANDSET REED
OPERATION MAX	稼働数量上限値	稼働数量上限値	SET POINT MAXIMUM
OPERATION MIN	稼働数量下限値	稼働数量下限値	SET POINT MINIMUM
Pulse	脈沖	脈沖	Inhibit
Pulse	脈沖	脈沖	Inhibit
Pulse	脈沖	脈沖	Inhibit
Pulse	脈沖	脈沖	Inhibit
STOP	停止/停止	停止/停止	Inhibit
AUTOMANUAL	自動/手動	自動/手動	ALTDARBEIT/IMMANUELL
INITIALIZE	設定値初期化	設定値初期化	INITIALISIEREN

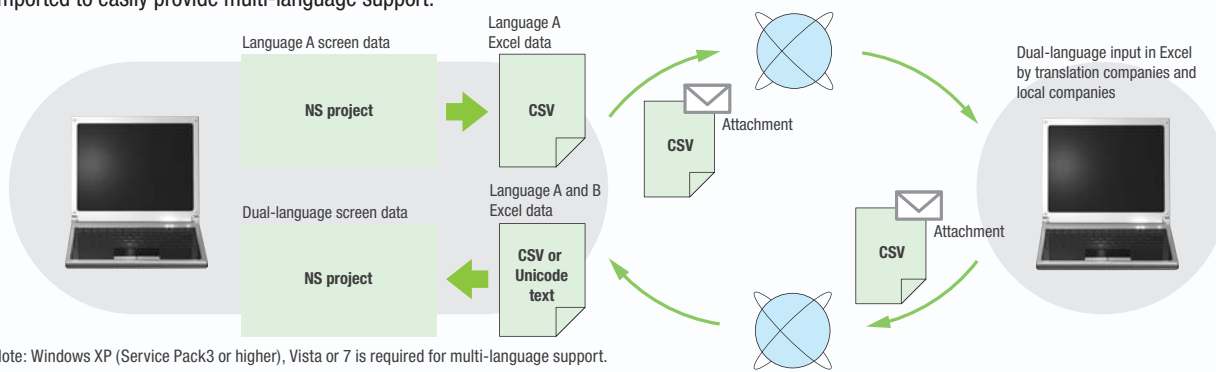

The labels' text attributes can also be reflected when importing.

When screen data is imported, text attributes can be applied to the specified labels and attributes such as the font and text color can be reflected to other languages labels.

Multi-language conversion has become much easier.

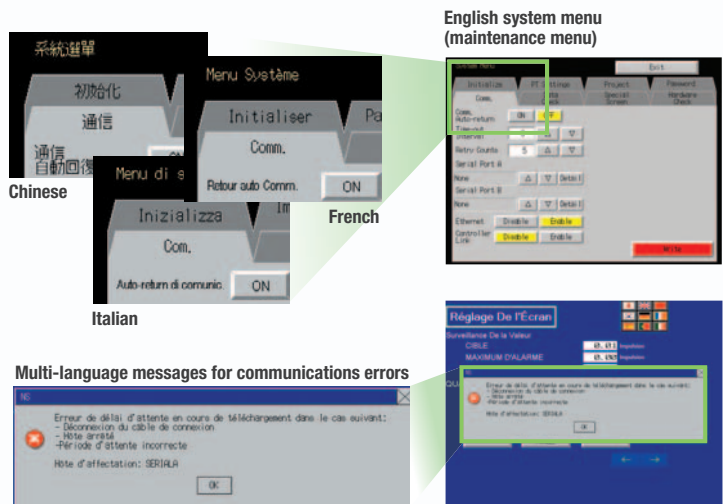

The screen data in the source language is exported to a CSV file and sent to a translation agency by e-mail for translation. Later, the translated CSV file is just imported to easily provide multi-language support.

Note: Windows XP (Service Pack3 or higher), Vista or 7 is required for multi-language support.

Multi-language System Messages. Eight Languages Supported as Standard Feature

The system program of NS-series PTs supports Chinese and European languages. All eight languages are a standard feature, including Chinese (traditional and simplified), Spanish, Italian, German, and French, in addition to the previous Japanese and English. Along with maintenance menus, messages for communications errors, communications settings, and screen transfers can be displayed in any of eight languages. Maintenance can be performed in the desired language. The language can be easily set using the NS-series PT or screen data.

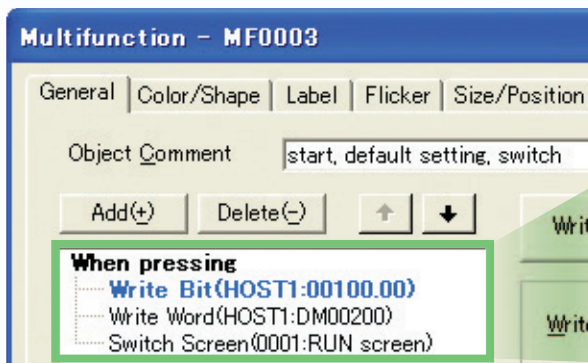

Design

Multiple functions

Execute up to 32 functions with one Multifunction Object
Multifunction Objects support Write Bit, Write Word, object control, and etc

Multifunction Objects combine the functions of multiple objects into one object. Multiple functions can be executed by pressing one button without using troublesome macros. Setup is easy. For example, a setting can be made on-screen using the Support Software to turn ON a bit to start a machine, set a value, and then change the screen.

Easy On-screen Setup with Support Software!

Multifunction execution with one object

Integration

Execute multiple functions with one button.

Multifunction Objects support four useful functions

Switches that do not immediately operate when touched can be easily made without ladder programming.

ON delay Turns ON when the button is pressed for at least a specified time.

Double-press Turns ON when the button is pressed twice within the specified time.

Simultaneous pressing prohibited Does not turn ON when the button is pressed at the same time as another button.

OFF delay Turns OFF after a specified time lapses after the button is released.

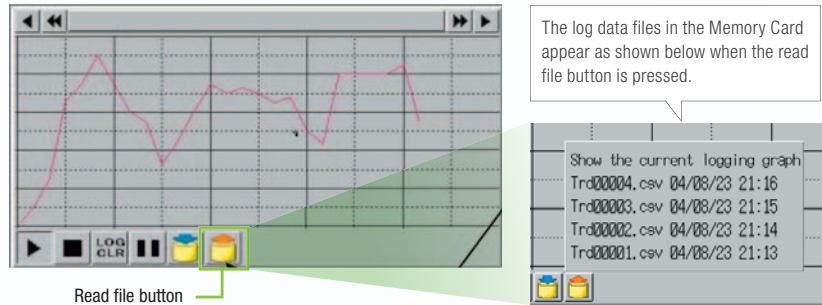

Plentiful Graphing Functions

Data Log Graph (Trend Graph)

Up to 128 data can be collected in the cycle of 500ms. Logging data is stored as a CSV file in the Memory Card inserted in the NS-series PT.

Logging data is stored as a CSV file in the Memory Card mounted in the NS-series PT. The data stored in the Memory Card can be read or deleted from the screen.

A log can be saved automatically, without any programming, just by selecting the Save the data periodically Option in the Data Log Setting Window.

Line Graph Function

The data logged by the PLC can be displayed in overlapping graphs, so a device's operation can be compared for evaluation and analysis. In addition, up to 1,000 words of consecutive data can be displayed as a line graph, data can be displayed together, and any region can be magnified.

(1) Graphs can be superimposed.

(2) The display can be magnified.

Continuous Line Function

Any position from the host (PLC) can be plotted as a graph. A graph can be plotted in any position by specifying the X and Y coordinates of the vertices. Also, the graph can be moved on the screen by specifying the movements from the PLC.

Design

Screen Data Security Functions

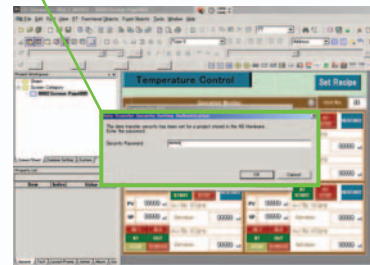

Protect important screen data with a password.

If password protection is set in the data transfer security settings when the screen data is designed, a password must be entered to download or upload the screen data, so important screen data can be protected.

If a password has been set, the password is required to transfer screen data (download or upload) with the Memory Card.

Security password

A password between 4 and 64 characters long can be set. The download/upload will start if the user inputs the password that was set when the screen was designed. (Password input will be disabled if the wrong password is input 3 times in a row.)

Device Data Transfer

Easy Data Exchange between the PLC and Components

For example, temperature controller alarm values can be transferred to the DM Area of the PLC's CPU Unit. No communications programming or macros are required.

Multi-vendor Support

Multi-vendor Support

Devices from multiple vendors are supported. Data can be easily exchanged with PLCs from other companies and Modbus devices.

Easy Settings

To make the settings, simply specify the device and addresses of the transfer source and transfer destination in the CX-Designer. Settings can be made using the same procedure as for setting the addresses for normal components.

Easy Settings

CX-Designer Select Device Data Transfer Setting from the PT Menu.

Make the settings simply by specifying the addresses of the transfer source and transfer destination as well as the number of data items.

Note 1: EtherNet/IP tags are not supported.
 Note 2: CX-Designer version 3.1 or higher is required.
 NS system version 8.2 or higher is required.

Beauty Screens and Objects

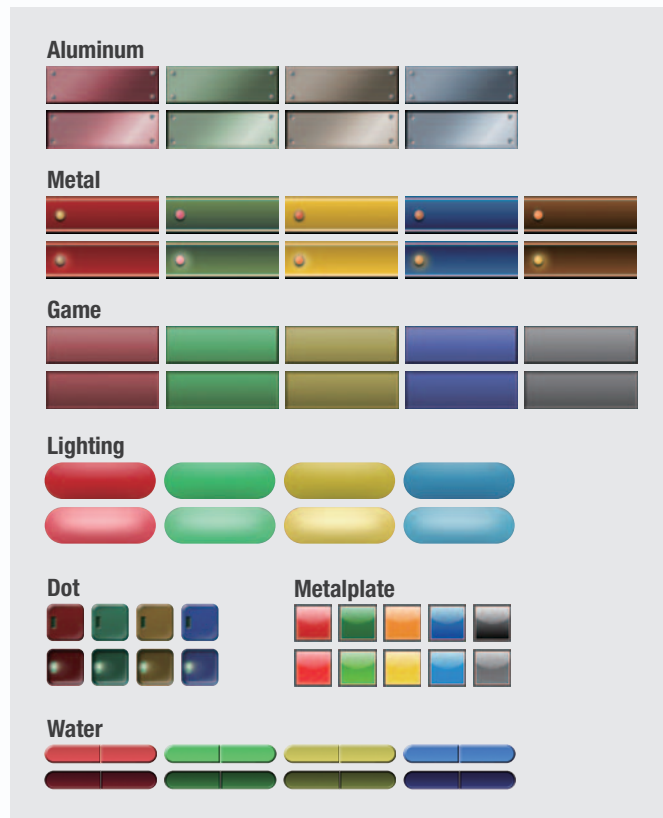

“Cool” Screen Templates

Professionally designed screen templates are provided. There are seven different types of attractive screen templates for different themes. Simply select the best template from the library.

“Cool” Objects

Backgrounds, buttons, labels, message boxes, and other objects are also provided for various themes.

Screen Designer for NS Series, CX-Designer

User-friendly Screen Creation

Without screen creation and ladder programming, the CX-Designer Screen Design Software is so easy-to-use that anyone can master it. Quickly create the required screen by dragging and dropping objects. OMRON's unified development environment lets you drastically reduce the work required to create screens.

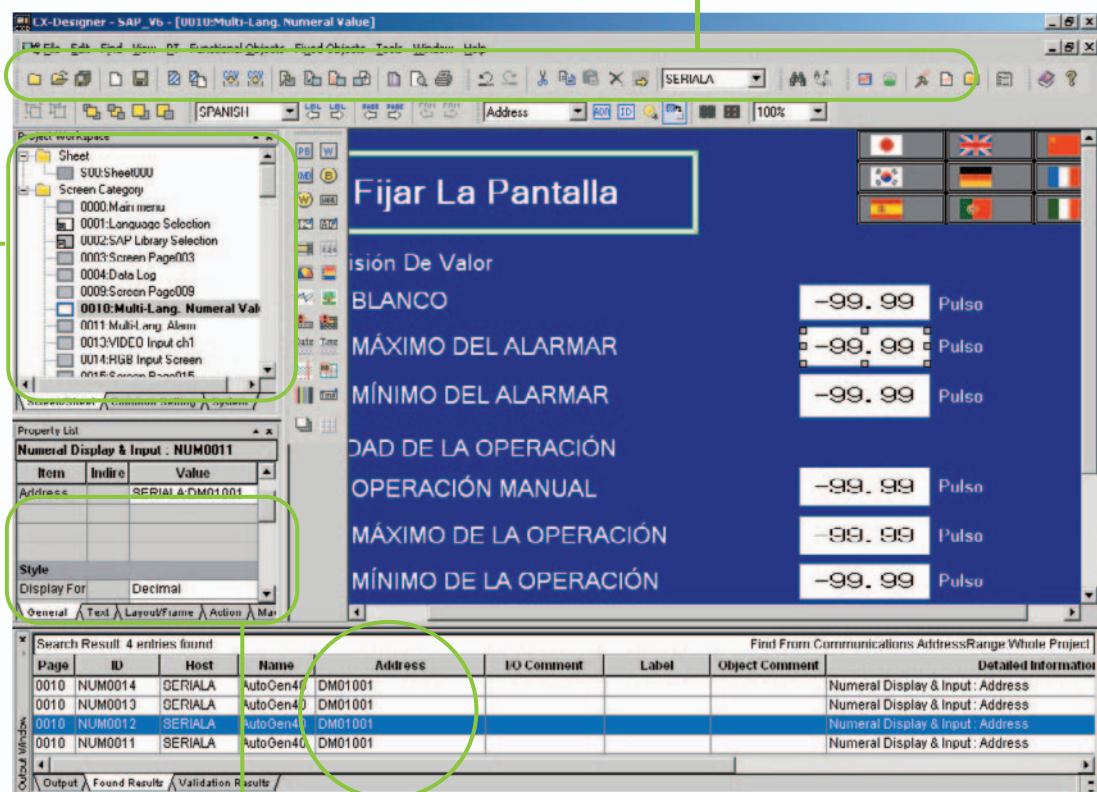

Note: The same type of Project Workspace and Output Window as in the CX-Programmer are provided for the user interface.

All addresses and comments can be managed using a single Symbol Table.

Shows a list of addresses, names, and comments in project screen data. Addresses, names, and I/O comments for the CX-Programmer can also be imported.

Host	Name	Type	Address	Type/Number	I/O Comment	Tag
All	All	All	All	All	All	All
H0T3	STOP	BOOL			STOP SWITCH	Network Variable
H0T3	RUN	BOOL			RUN SWITCH	Network Variable
H0T3	AutoGen0	CHANNEL	00000			None
H0T3	AutoGen1	CHANNEL	00001			None
SERIALA	LEFT	BOOL	00001.00		LEFT SWITCH	None
SERIALA	RIGHT	BOOL	00001.00		RIGHT SWITCH	None
SERIALA	AUTO	BOOL	WFO0000.00		AUTO SWITCH	None
SERIALA	PARK	BOOL	00000.00			None
SERIALA	AutoGen2	CHANNEL	\$N0		PARKING	None
PTMEM	AutoGen1	BOOL	\$D0			None

Improved Icons and Help

The project Workspace enables the user to look through the entire project.

- Screens you want to edit can be opened right away.
- Perform screen management, such as copying or deleting screens, by simply right-clicking.
- Reusing screens from other projects is easy with the CX-Designer.
- Settings for alarms, data logs, communications, and other functions can be easily accessed.

Drastically reduce the number of clicks in the project.

Just click on the object once to display or change properties. Multiple objects can be selected to display and change shared properties all at once.

The Output Window shows search results.

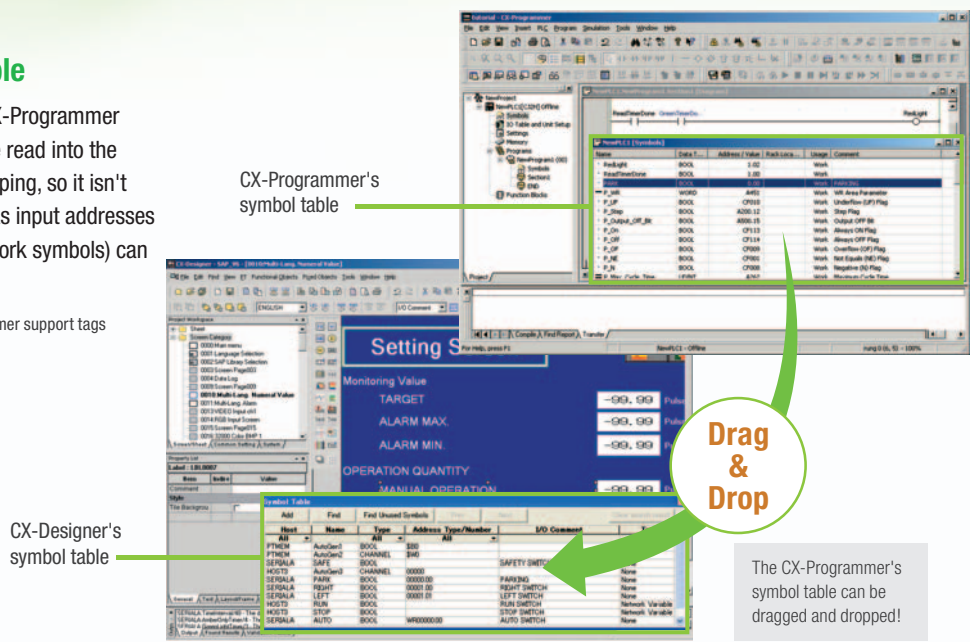

In addition to addresses and I/O comments used in screen data, labels can also be used as search strings and the results can be displayed.

Reading the Symbol Table

The symbol table created in the CX-Programmer during ladder programming can be read into the CX-Designer by dragging and dropping, so it isn't necessary to manually data such as input addresses and I/O comments. Tags (i.e., network symbols) can also be read into the CX-Designer.

Note: Version 8.0 or higher of the CX-Programmer support tags (i.e., network symbols).

CX-Programmer's symbol table

CX-Designer's symbol table

Drag & Drop

The CX-Programmer's symbol table can be dragged and dropped!

Example of Reading the Symbol Table

The symbol table read from the CX-Programmer can be directly dragged and dropped to the touch switch and lamp.

(1) Create a switch on the screen.

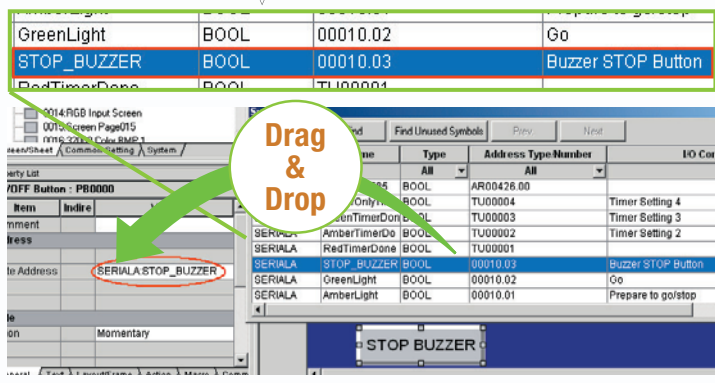

(3) Allocations for buttons and lamps can also be checked on the screen using comments imported from the CX-Programmer.

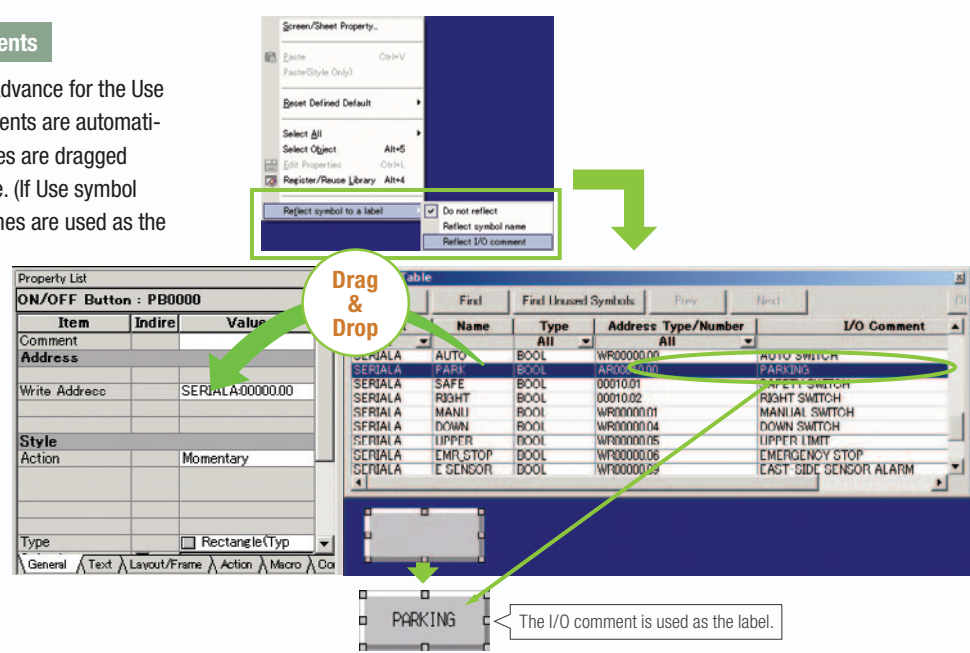

Example of Easy Address Allocation

(2) Check the comment then drag-and-drop the symbol from the symbol table to the property list.

Example of Reading I/O Comments

If Use I/O comment is selected in advance for the Use symbol text as label, the I/O comments are automatically used as labels when addresses are dragged and dropped from the symbol table. (If Use symbol names is selected, the symbol names are used as the labels.)

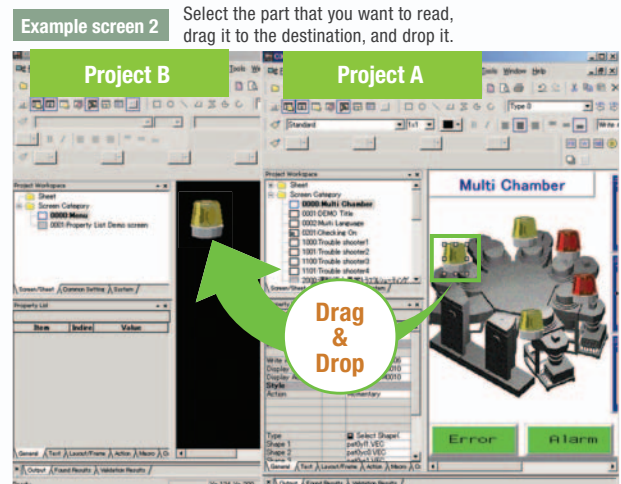

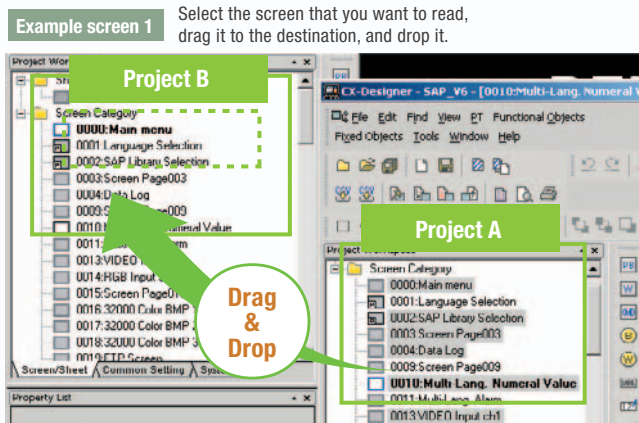

Drag & Drop

The I/O comment is used as the label.

Design

Reading Another Project's Screens and Objects

Resources from another project can be easily reused by just selecting the screen or objects that you want to read and dragging and dropping it, so screens can be created intuitively.

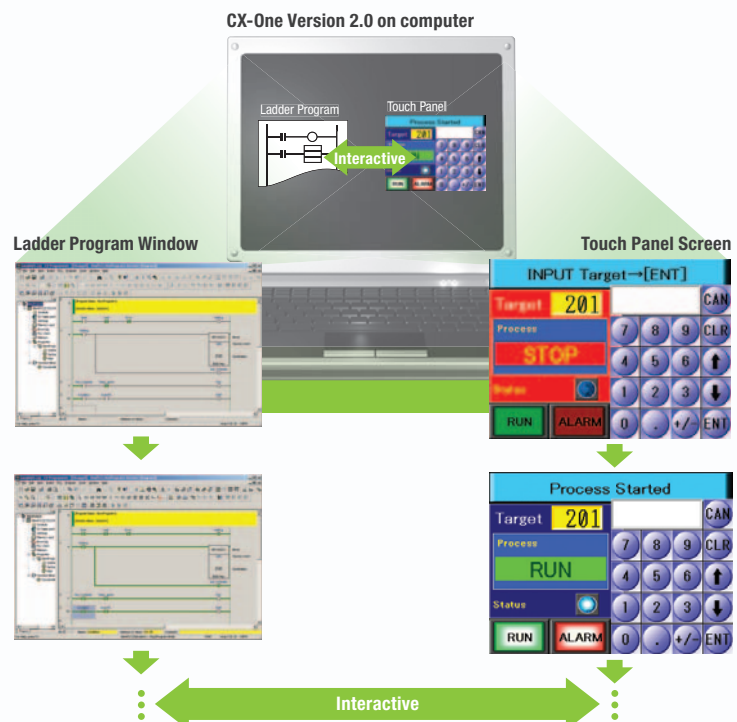

Reading CAD Files

It is possible to import DXF files by dragging and dropping them. The files are read as a diagram, and so less capacity is used than with images. It is also easy to customize the diagram by changing the shape or color.

The screen data and ladder program can be checked simultaneously in the computer.

The CX-Designer and CX-Programmer interconnects the test functions in the computer through the CX-Simulator. The screens and ladder program checks are performed simultaneously, which significantly increases debugging efficiency. The CX-Programmer also has a new button for integrated simulation. And, work efficiency is further improved with the ability to keep required work screens pinned on front and to zoom in or out as desired.

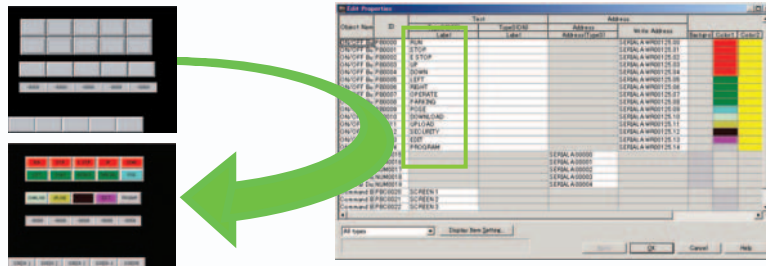

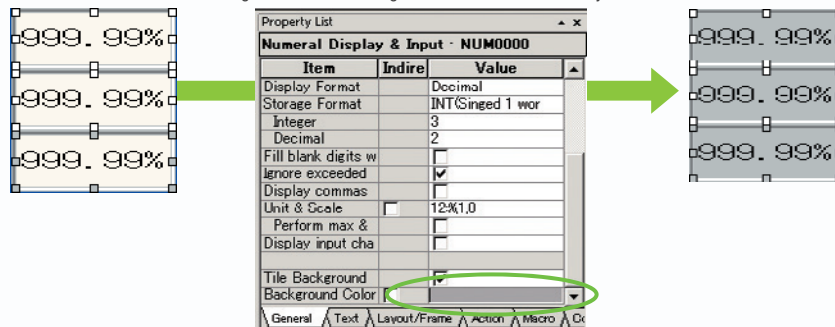

Editing of Multiple Objects

Addresses and other settings, such as labels and colors, can be set together in a list, making editing operations much more efficient. When the common attributes (such as background color and text color) of multiple parts are being changed, the attributes can be changed together using the property list.

Example screen 1 After editing the settings in the list, press the OK Button to make the new settings effective immediately.

Example screen 2 If the background color is changed from white to gray in the property list, the background color is changed for all of the selected objects.

Editing of Overlapping Objects

The Select Object command is a powerful tool when you want to edit object hidden by overlapping. A filter function can also be used to aid editing by displaying only the objects to be edited.

Object Selection Window

Right-click and select Select Part to display the objects (all types) on the screen.

Select Object				
All types		Range Selection		Release All

(L)		LBL0016	72	168
(L)		LBL0017	96	80

Filter Function

Use the Select Part command's filter function to select the objects (ON/OFF Button) that you want to edit.

Only the edited object is displayed and it can be edited easily.

Startup/Operation

260,000-color Video Display

Equipment and workpiece movements can also be displayed in beautiful video

NS-CA001 Video Input Unit

Four video inputs or CCD cameras can be connected and up to four images can be displayed simultaneously if the image size is 320x240 pixels. The NS-CA001 cannot be used with the NS5 or the NS15.

NS-CA002 RGB/Video Input Unit

There is an analog RGB input terminal in addition to the two video input terminals. Either of the video signals or the analog RGB signal can be displayed on the NS-series PT. The NS-CA002 cannot be used with the NS5.

Note: Video input cannot be used with the NS15.
Only RGB input can be used.

Also Compatible with OMRON Vision Sensors.

Analog RGB Output

The NS screen is seen by another monitor.

The NS15 screen (XGA) can be displayed on an on-site display that has RGB inputs.

Note: Only NS15

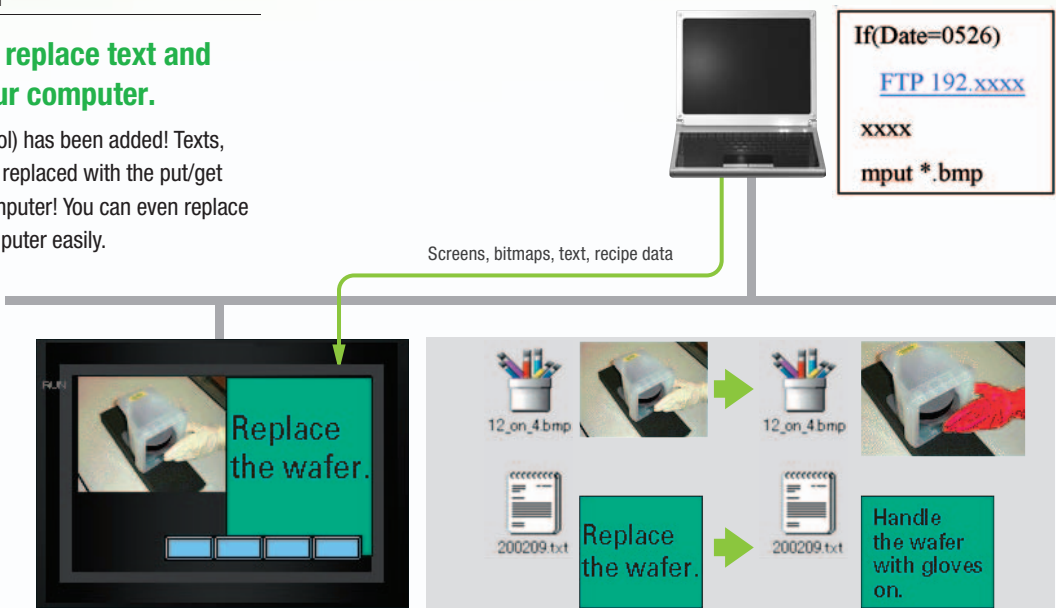

FTP Function

You can partially replace text and pictures from your computer.

FTP (File Transfer Protocol) has been added! Texts, lists, and recipes can be replaced with the put/get command from your computer! You can even replace BMP files from your computer easily.

User Security Functions

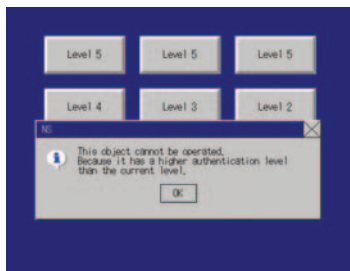

Operator access rights and the operating format can be set to one of five password levels.

Each operator can be given one of 5 password levels using the User Security (level authentication) function. A password level can be set for each object, so various objects can be made inoperable or hidden based on the operator's access level.

Level	Access Rights
Level1	Line Operator
Level2	Group Leader
Level3	Line Manager
Level4	Maintenance
Level5	Administrator

Low Level 1
Level 2
Level 3
Level 4
High Level 5

Operator passwords are managed in 5 levels. Passwords can be up to 16 characters long and the access rights increase as the level number increases.

The operator cannot manipulate objects with a password level (authentication level) higher than the operator's login level.

NS with LED backlight

NS5 color-type models (SQ/TQ models), NS8 models, NS10 models, NS12 models with LED backlight are newly released.*

LED backlight allows backlight brightness adjustment of up to 32 levels. The brightness can be adjusted from the operation screens, and the RUN indicator changes its luminance according to the settings of the backlight brightness; it is favorable for ship and vessel applications.

* LotNo.1520 or later of NS5 color-type models, LotNo.28X1 or later of NS8 models, LotNo.11Y1 or later of NS10 models, LotNo.14Z1 or later of NS12 models.

Conventional three-level adjustment

New 32-level adjustment

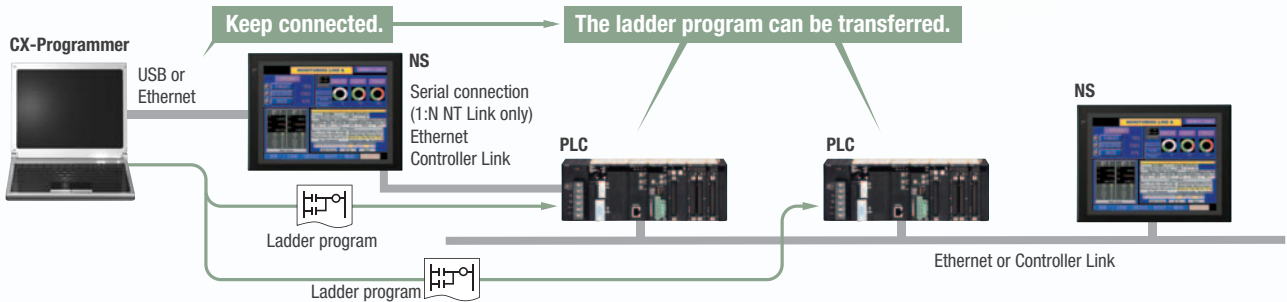

Maintenance

Single Port Multi Access (SPMA)

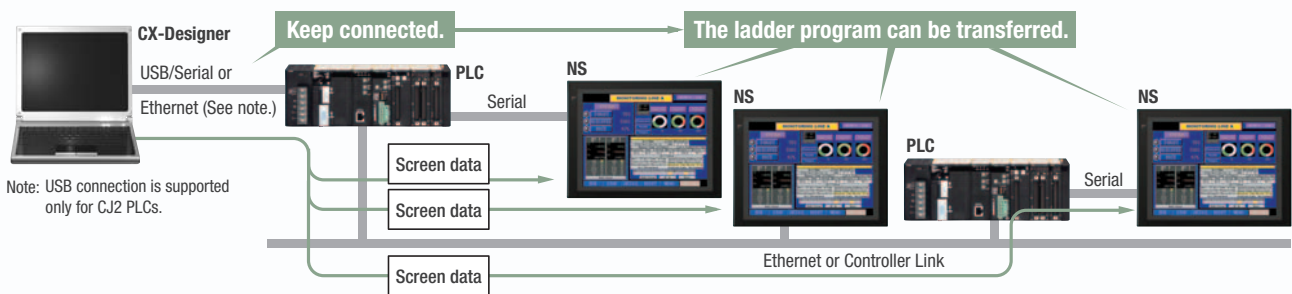

Transfer ladder program data to the PLC via the PT. Perform online editing via the PT.

[Computer (Serial/USB) → NS-series PT (Ethernet) → PLC (Ethernet or Controller Link) → PLC]

Transfer screen data via the PLC.

[Computer (Serial) → PLC (Ethernet or Controller Link) → NS-series PT]

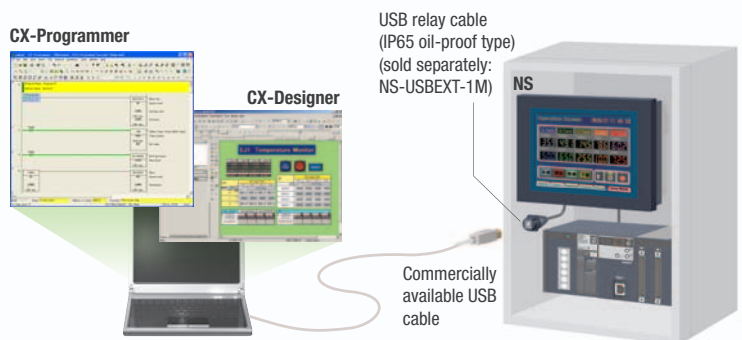

Note: USB connection is supported only for CJ2 PLCs.

Note: SPMA can be used in CS/CJ-series PLCs with lot number 030201 or later.
 Note: SPMA via a PLC is not supported when a CP-series PLC is connected. (SPMA via an NS-series PT is supported with a CP-series PLC.)

Using a USB relay cable greatly improves debugging at equipment startup.

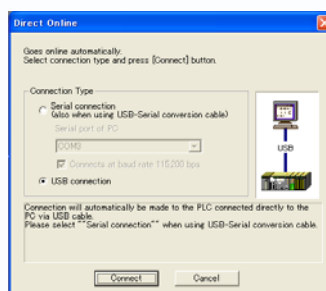

Use a USB relay cable to enable performing maintenance from in front of the control panel.

Easy Automatic Connection

A search is automatically made for the PLCs connected to the PT and the results are displayed using the automatic online connection function in the CX-Programmer. Just select a PLC from the list to connect. This function is also supported for PLCs over network layers.

PLCs registered to the PT are automatically searched for. Make the connection simply by selecting from the PLC list.

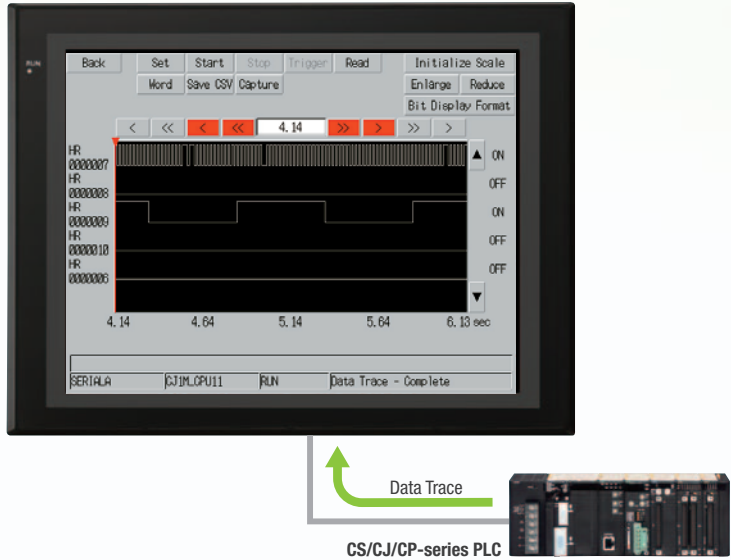

- Note 1: SPMA can be used in CS/CJ-series PLCs with lot number 030201 or later.
- Note 2: SPMA via a PLC is not supported when a CP-series PLC is connected. (SPMA via an NS-series PT is supported with a CP-series PLC.)
- Note 3: CX-Programmer version 8.2 and higher support automatic online connection via the PT. NS system version 8.2 or higher is required.

PLC Data Trace

The PLC data trace function can be used without a computer.

The PLC Data Trace function is built into the PT in addition to the Ladder Monitor and Device Monitor. A bit's status and operation can be viewed in a time chart just by setting the desired PLC bit's address in the PT. It is also now possible to display word data, save data in CSV files, and save time chart screens in BMP files.

- Note 1: There are differences between this Data Trace function and the CX-Programmer's Data Trace function. Refer to the NS-series Programmable Terminal Programming Manual (Cat. No. V073) for details.
- Note 2: The PLC data trace function cannot be used with the 5.7-inch model.
- Note 3: The PLC data trace function is not supported for connection with a CP1E PLC.

Operating log

What Was Touched When? can be recorded.

Functionality has been improved with the addition of a log to record operators' use of the panels. It is now possible to record and display the time, date, and operation details for buttons (i.e., hardware switches) pressed on the control panel in addition to operations on the touch panel. The operation log can be saved in a CSV file on a Memory Card mounted in the NS-series PT.

2008/07/07 15:51:03	Macro	When chang	Page:0000	Obj ID:0000	When chang

Multiple operation log files can be saved on a Memory Card with date and time data.

Memory Card

- Operat_080520_173000.csv
- Operat_080521_173000.csv
- Operat_080522_173000.csv

The files can be opened in Excel.

	A	B	C	D	E	F
1	Date&Time	O	Message	Page ID	NewPage	Event
2	Date&Time	P	Message	OldPage	NewPage	
3	Date&Time	M	Message	Page ID	Event	
4	Date&Time	A	Message	Host Address	Event	
5	2008/7/7 15:49 M			PO ID0	EV25	
6	2008/7/7 15:49 O		Stop button	PO ID0	EV20	
7	2008/7/7 15:49 M			PO ID0	EV25	
8	2008/7/7 15:49 O		Stop button	PO ID0	EV21	

Switch directly from the user screen to the log operation display screen.

For example, with a control panel comprised of the NS-series PT, hardware switches, and an emergency stop button, you can even record and display operation of the emergency stop button.

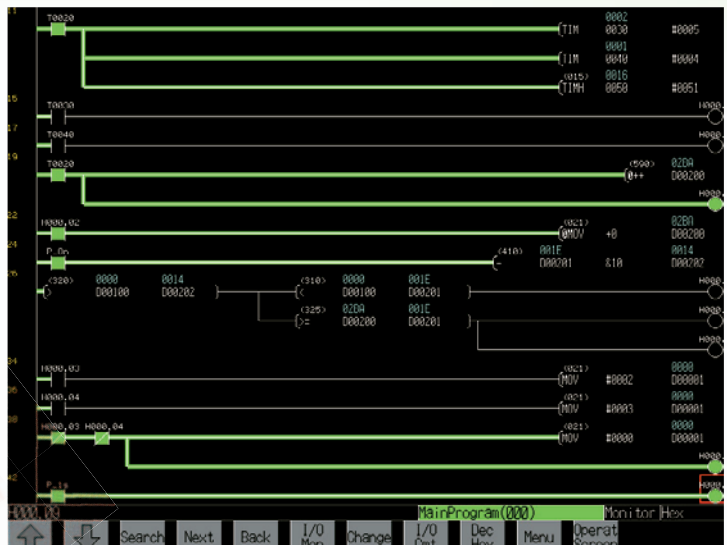

A comment of up to 32 characters can be set and displayed for each operation to provide easy-to-understand information about what type of operation was performed.

Maintenance

Ladder Monitor

The ladder program can be monitored without a computer.

Ladder programs with I/O comments can be monitored on the PT's screen and the ladder program can also be edited with the Programming Console function.

Also meets the requirements of users who need to display devices onsite

Switch Box Function

The operator can check the PLC status by displaying just the I/O comments and status.

Device Monitor Function

Displays the device's contents, allowing settings to be input and checked and making startup operations more efficient.

Switch Box Function

so no extra work to show I/O comments

Read I/O comments directly from the PLC. I/O comments do not have to be stored in a Memory Card.

Easy checking the alarm bit and shortens searching time.

When an alarm occurs, touch the message to automatically search for the alarm bit (output bit) for the alarm. This enables you to quickly check the alarm address and investigate why the bit turned ON.

“Find Back”, “Find Next”, useful Function Supported by the NS-series.

Reduced Time to Investigate Which Output or Input Is Causing the Problem.

Function	Operation with NS-series PT.	CX-Programmer
Find the address at specified by the cursor.		“N” Key
Find the output from the input bit or find the input bit from the output at the cursor.	Double-click	“Space” Key
Return to the previous search position.		“B” Key

2. Is this input the cause? What output corresponds to this input?

4. Which of these two inputs is the cause? Let's look at CIO 21.00 first.

6. So is it input CIO 21.01 after all?

Yes, the problem is here!

1. Why is this output not turning ON?

3. Why is this output not turning ON?

5. There's no problem with input CIO 21.00. Let's go back to the previous program section.

Back

Force-setting and force-resetting are possible

Locations that have been force-set are displayed in pink and can be checked at a glance.

1. Select the input bit for which the output will be forced ON.

2. Select the address by touching the panel.

3. Select the Forced Set Option and then press the Update Button.

4. Forced ON

Minor changes in values of timers or counters can be made without Support Software.

Check and Change I/O While You View the Ladder Diagram on the I/O Monitor

Display and change the present value by specifying the address. It is also possible to force-set/reset bits with the I/O monitor.

Address	Present value	Address	Present value	Address	Present value	Address	Present value
4000.03	OFF	4010.03	OFF	4030.03	0000	4050	0000
4000.04	OFF	4010.10	ON	4030.100	0000	4030.100	0000
4010.03	OFF	4022.10	OFF	4030.10	0000	4030.10	OFF
4010.03	ON	4040.04	OFF	4000	0000	ON	4001.00
4010.03	ON						ON

Make the selection with the I/O monitor by touching the screen.

Changing the present value of the address selected with the Change Value Button

Note: The Ladder Monitor function is not supported by the 5.7-inch models.

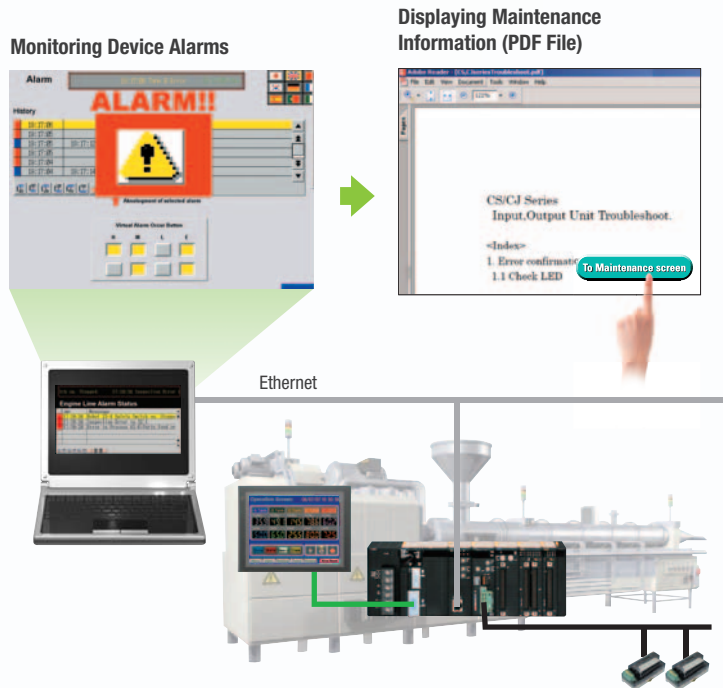

NS-Runtime

NS-NSRCL (NS-Runtime)

Achieve machine/line monitoring and data logging on your office computer.

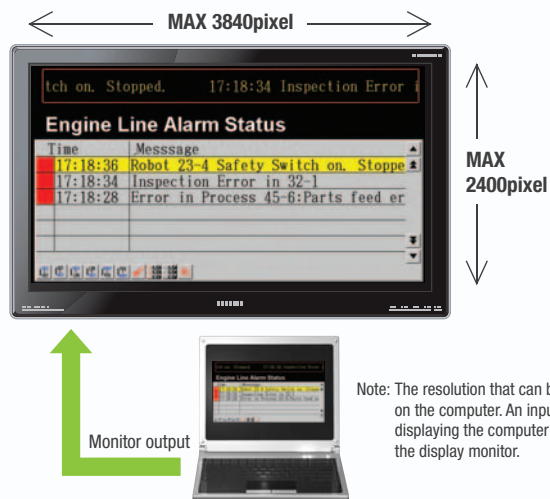

Machine Viewer

Machine monitoring in an office environment. There is no need to create complex host applications. Moreover, when an alarm occurs, a PDF file can be displayed as maintenance information. NS Series screens can be reused on the computer, and screens can be also newly created independently of touch panels at the production site.

Wide Screen

Computer output can be displayed on another wide-screen monitor. XGA (1,024 x 768 dots) and up to a maximum screen size of 3,840 x 2,400 is supported. Alarms occurring in devices or the line can be monitored.

Data Logger

Log large amounts of data using a personal computer. Data can be logged through background processing, with up to 160,000 points stored in one file. The logged data is stored in CSV format, and data can be displayed on data log graphs.

Example: 160,000 Points

Data can be logged for approximately 7.4 days, assuming data is logged every two seconds for 12 hours a day. By using automatic file saving, data logging can be continued even longer than 7.4 days.

Recipe Handling

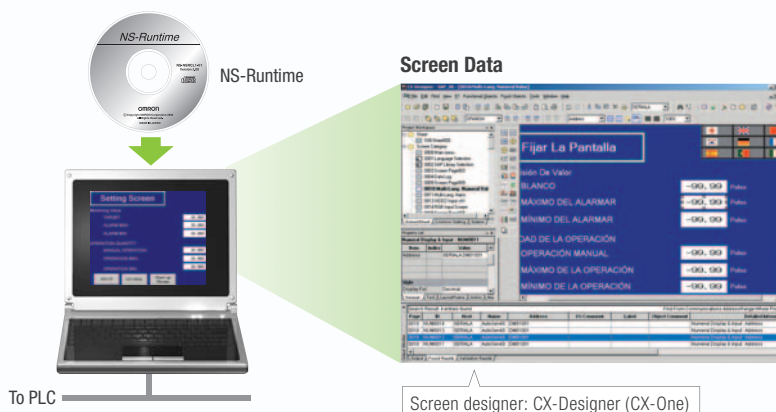

Checking machine data or switching processes from a host computer is easy. Parameter groups in the PLC can be transferred together to a computer, and the transferred data can be checked and edited in CSV format, e.g., using Excel. The edited data can then be transferred together back to the PLC.

Easy Installation

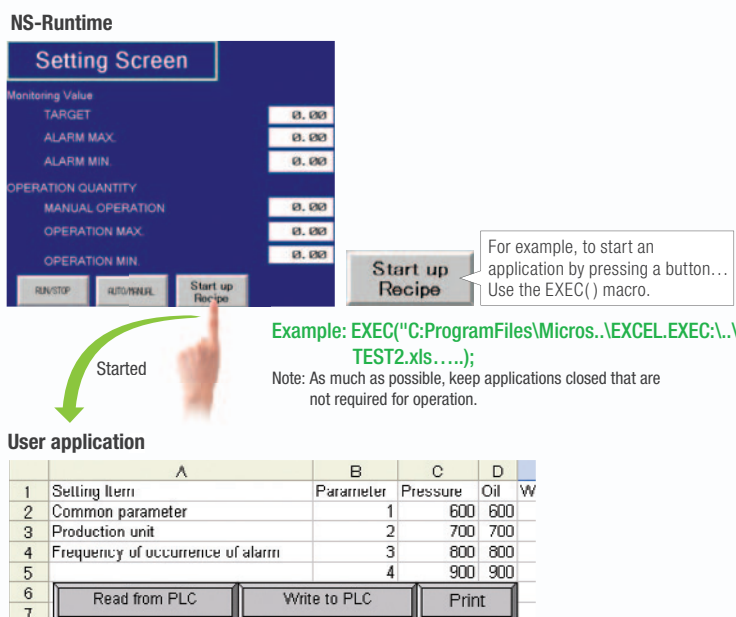

To get started, just install the NS-Runtime in the computer and place the screen data in the applicable folder. NS/NSJ-series screens and NS-Runtime screens can all be managed using one single tool.

Note: The NS-Runtime will operate in a computer environment even if the CX-Designer installed is not installed. The hardware key (USB dongle) that is supplied with the NS-Runtime is required for operation.

Application Startup Function

User applications can be started from NS-Runtime. Applications can be started simply by pressing buttons on the screen.

Note 1: If the screen data is converted for the NS Series, NS-Series PT system versions must be 8.1 or earlier. The screen data of system version 8.2 can not be converted for the NS-Runtime.
 Note 2: Do not use this product for 24-hour operation in an FA environment. OMRON shall not be responsible if the computer or application does not operate properly due to noise or other causes. OMRON shall not be responsible for any problems that may be caused by any applications other than OMRON products.

Hand-held PT

NSH5 Series

A hand-held version of the NS5 is now available to perform operations at the production site. The NS-series PT's have a complete set of functions that can be used at the production site, such as the SAP Library, multi-language support, and Programming Console functions.

Function Switches
Use the ten functions switches.
F1, F2, F6, F7: Wired outputs
F3 to F5, F8 to F10: Communications outputs

Memory Card Interface and USB Slave Connector.
Easily transfer screens or save logs at high speed using a USB connection.

Emergency Stop Switch.
3PST-NC Structure
DPST-NC: Increase safety (wired outputs).
SPST-NC: Input to internal NSH5 memory, output to a lamp for emergency stop switch operation, or output via communications, e.g., to a PLC.

Water Resistance to IP65
The water-resistant structure is equivalent to IP65 on all surfaces. The PT may not be suitable for use in environments with long-term water exposure.

3-Position Enable Switch
Increased safety with DPST-NO structure (wired outputs).

PT and Cable Sold Separately
Select the Cable according to the application (RS-232C/RS-422A).
Connector-loose wires, UL connector, 3 m or 10 m.

Precautions for Emergency Stop Switches

When using a hand-held NSH5 that will be installed and removed from a control panel or Removable Box, always use the specified Stop Switch (Gray/NSH5-SQG10B-V2) to conform to Safety Standards (EN 60204-1).

Options

Removable Box

A separate external circuit is not required because the Removable Box has been configured so that the emergency stop switch line will not turn OFF (i.e., so that the emergency stop circuit will operate) even when the NSH5 is removed.

Visor

Use when the NSH5 is in direct sunlight.

Mounting Bracket

Use to attach the NSH5 to a control panel.

Programmable Terminals NS Series

Even Simpler Equipment Operation with Outstanding Synergy.

Features

- 5.7 to 12.1 inch sizes are available.
- A hand-held version of the NS5 is now available to perform operations at the production site. The NS-series PT's have a complete set of functions that can be used at the production site.
- The Smart Active Parts(SAP Library) makes it easy to connect to OMRON PLCs and components, OMRON provides a development environment that requires with no programming and no screen designing.
- When an error occurs in a Unit in the OMRON PLCs, the Troubleshooter SAP Library provides an easy-to-understand explanation of the cause of the error as well as the countermeasures.
- Ladder Monitor come as a Standard Feature. The ladder program can be monitored onsite without a laptop! Ladder monitor lets you monitor PLC program status, search for addresses or instructions, monitor multiple I/O points, and much more.
- Provides the FA integrated tool package "CX-One" for a Screen Design Software Integrated Simulation come as a Standard Feature. The integrated simulation function simulates ladder programs and screen data simultaneously even without the actual hardware.
- Screens support 42 languages and the Support Software supports eight. System messages can be displayed in eight languages.
- Single Port Multi Access (SPMA) come as a Standard Feature. The ladder program and screen data can be transferred from a single port!
- Connectable PLCs and devices appear one after another.
Has become connectable with the PLCs of Mitsubishi Electric Corporation and the Inverters of OMRON Corporation.

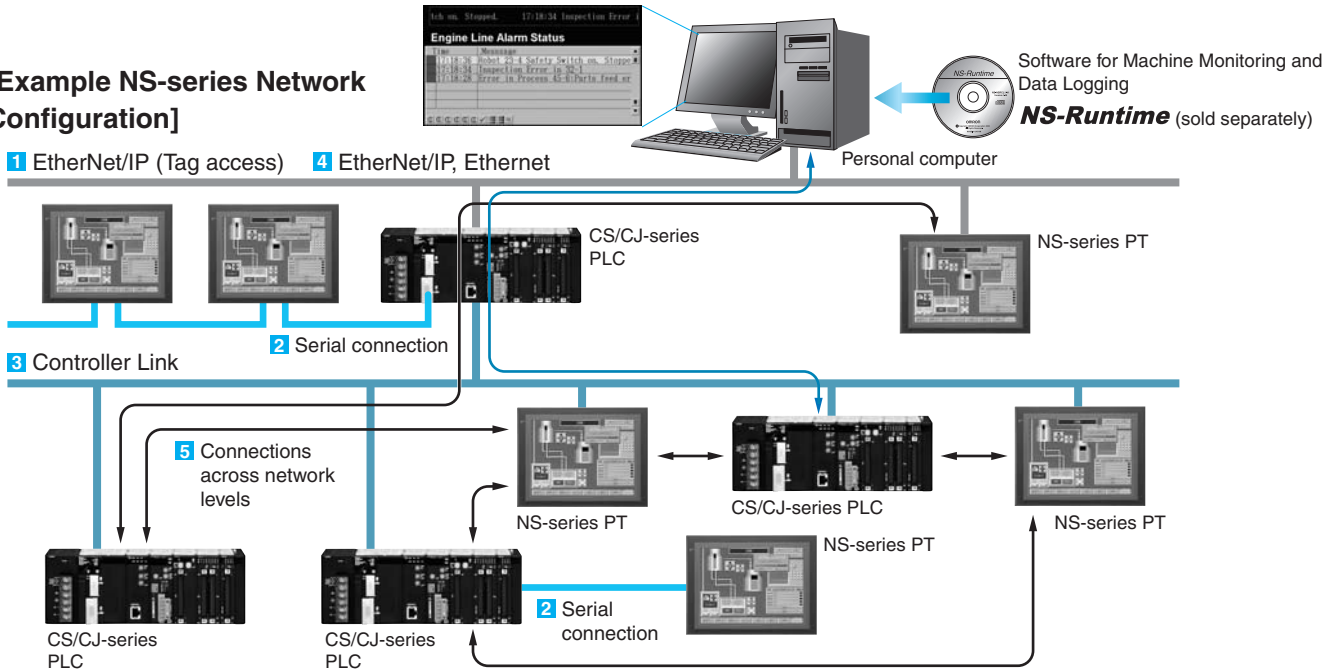

Sysmac is a trademark or registered trademark of OMRON Corporation in Japan and other countries for OMRON factory automation products. Windows is registered trademarks of Microsoft Corporation in the USA and other countries. EtherCAT® is a registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany. Other company names and product names in this document are the trademarks or registered trademarks of their respective companies.

NS Series

Network

Provides serial NT Link communications supporting both 1:1 and 1:N connections. The NT Link has more efficient communications than Host Link and its capabilities are especially apparent in applications with multiple PTs connect to the PLC. The NS-series PTs can also support communications with multiple PLCs and multiple NS-series PTs through Controller Link and Ethernet connections, so the network can be configured freely to match the requirements and scale of the application. In addition, using the NS-Runtime makes it possible to monitor machine status and log data from the host.

[Example NS-series Network Configuration]

Configuration of CJ2 series and NJ series

1 EtherNet/IP Connection (Tag accesses)

If an Ethernet-compatible NS-series PT is used, the PT can connect to a Controller with built-in EtherNet/IP and an Option Unit is not needed to connect at the PT.

Configuration of CS series, CJ series and CP series

2 Serial connection

1:1 NT Link or Host Link

●NS:PLC = 1:1

Connecting with the PLC through port A or port B

●NS:PLC = 1:2

1:N NT Link

●NS:PLC ratio = 8:1 max. Up to 8 NS-series PTs can be connected to each of the PLC's RS-232C/RS-422A ports.

3 Controller Link Connection

The PT can be connected to an OMRON Controller Link network by mounting a Controller Link Interface Unit.

If a Controller Link connection is used, data links can be set between PLCs and multiple PLCs can be monitored/set from the NS-series PT's screen.

- Baud rate
 - 2 Mbps (500 m max.)
 - 1 Mbps (800 m max.)
 - 500 kbps (1 km max.)
- Max. number of nodes: 32 nodes

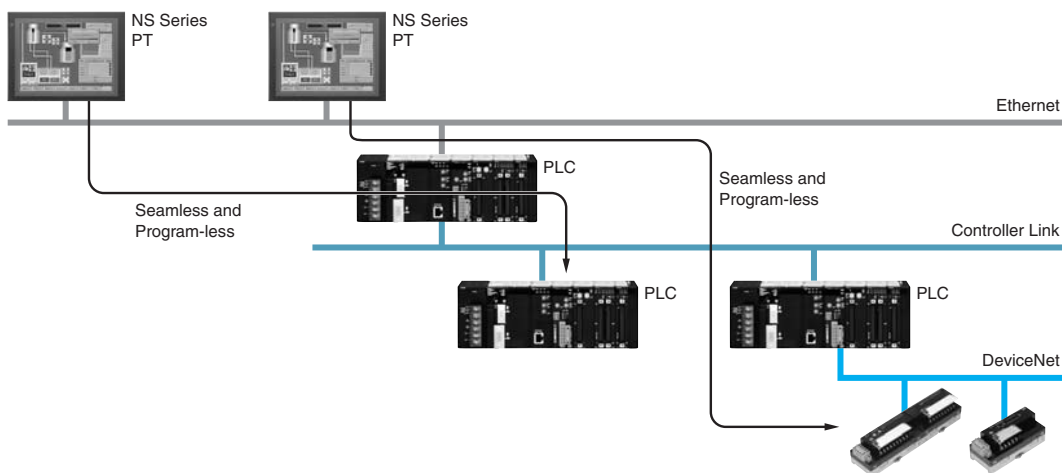

4 Ethernet Connection

If an Ethernet-compatible NS-series PT is used, the PT can connect to a PLC with an Ethernet Unit and an Option Unit is not needed to connect at the PT.

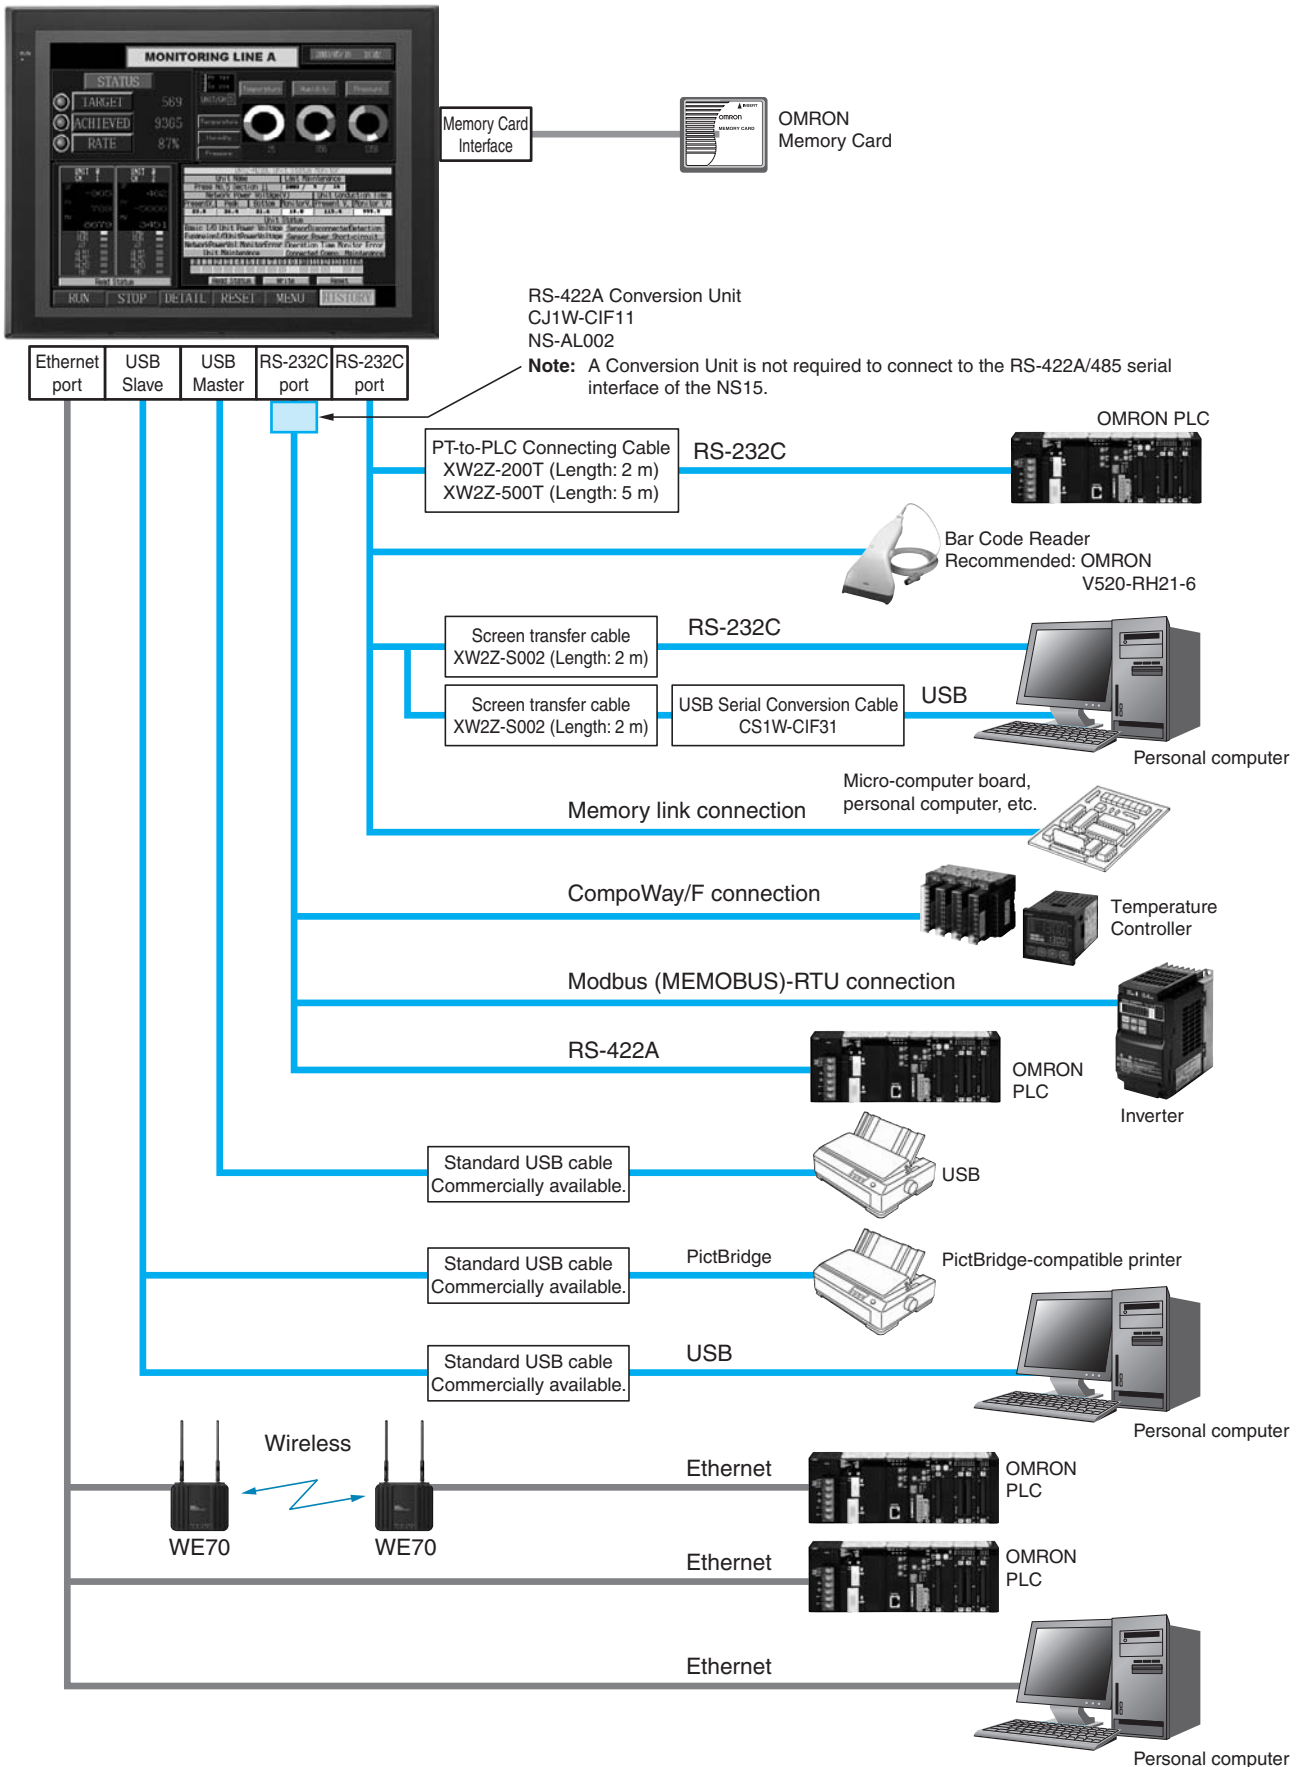

5 Connections Over Network Levels

The NS-series PTs can connect to a variety of devices in the network, through as many as 3 network levels. For example, if SAP (Smart Active Parts) are being used, an NS-series PT connected by Ethernet can be used to monitor the information in a PLC connected through Controller Link as well as the information in the DeviceNet Slaves connected to that PLC.

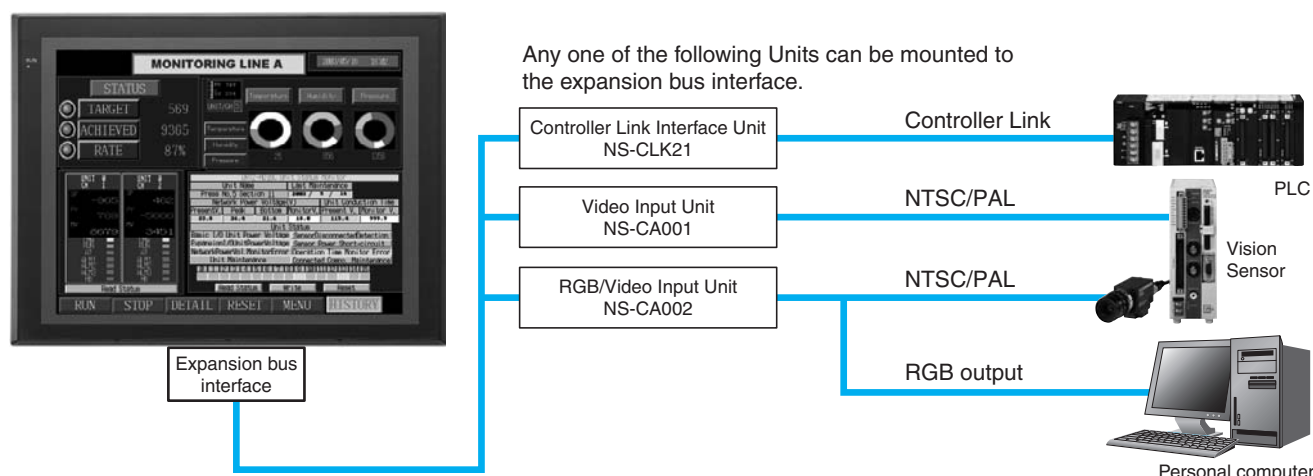

System Configuration

NS5/NS8/NS10/NS12/NS15

Expansion Bus Interface

Note: Video Input Units and RGB Video Input Units cannot be used with some models.

Multi-vendor

Note: Whether an RS-422A or RS-485 connection is supported depends on the device that you are connecting to. For details, refer to the Connectable Devices page or NS-Series Programmable Terminals HOST CONNECTION MANUAL Multivendor Connection (Cat.V092).

FA Integrated Tool Package CX-One Ver.4.□	The CX-One is a comprehensive software package that integrates Support Software for OMRON PLCs and components. CX-One runs on the following OS. Windows XP (Service Pack 3 or higher), Vista or 7 Note: Except for Windows XP 64-bit version CX-One Version 4.□ includes CX-Designer Ver.3.□. For details, refer to the CX-One catalog (Cat. No. R134) CX-Designer can still be ordered individually in the following model numbers.	license *1	DVD *2	CXONE-AL01D-V4	—
	Screen Designer for NS Series Windows XP (Service Pack 3 or higher), Vista or 7 Note: Except for Windows XP 64-bit version The Ladder Monitor Software is included with CX-Designer Ver.3.□. Note: The Ladder Monitor Software is used to monitor CS/CJ-series PLC ladder programs from an NS-series PT. A Memory Card and Memory Card Adapter (both sold separately) are required to use the Ladder Monitor Software with the NS8-V1, NS10-V1, or NS12-V1, or with the NS8-V2, NS10-V2, or NS12-V2 with system program version 6.6 or lower.	1 license	CD	NS-CXDC1-V3	—

*1. Multi licenses are available for the CX-One (3, 10, 30, or 50 licenses).

*2. The CX-One is also available on CD (CXONE-AL□□C-V4).

● Automation Software Sysmac Studio

Please purchase a DVD and required number of licenses the first time you purchase the Sysmac Studio. DVDs and licenses are available individually. Each model of licenses does not include any DVD.

Product name	Specifications			Model	Standards
		Number of licenses	Media		
Sysmac Studio Standard Edition Ver.1.□	The Sysmac Studio provides an integrated development environment to set up, program, debug, and maintain NJ-series Controllers and other Machine Automation Controllers, as well as EtherCAT slaves. Sysmac Studio runs on the following OS. Windows XP (Service Pack 3 or higher, 32-bit version) /Vista (32-bit version) /7 (32-bit/64-bit version)	-(Media only)	DVD	SYSMAC-SE200D	—
	The Sysmac Studio Standard Edition DVD includes Support Software to set up EtherNet/IP Units, DeviceNet slaves, Serial Communications Units, and Support Software for creating screens on HMIs (CX-Designer). For details, refer to the Sysmac Integrated Catalogue (P072).	1 license*	—	SYSMAC-SE201L	—

Note: To connect the NJ-series Controller, NS system version 8.5 or higher is required. CX-Designer version 3.3 or higher is also required.

* Multi licenses are available for the Sysmac Studio (3, 10, 30, or 50 licenses).

Cable

Product name	Specifications	Model	Standards
Cable *1 	Screen transfer cable for DOS/V (CX-Designer ↔ PT)	Length: 2 m XW2Z-S002	–

- *1. Use a standard USB Type A male to Type B type male Cable to connect the NS series PT to a personal computer (CX-Designer).
Use a standard USB cable to connect the NS series PT to a PictBridge-compatible printer. USB cable type depends on the printer.
- *2. To connect the NS series PT to NJ series Controller, using a commercially available 10/100-BASE-TX twisted-pair cable.
For detail, refer to the NS series SETUP MANUAL (Cat. No.V083).

Bar Code Reader	CCD handheld bar code reader (RS-232C interface)	V520-RH21-6		

*1. One screen cannot display two video inputs simultaneously.

*2. A Chemical-resistant Cover (NT30-KBA01) is available only for the NS5.

General Specifications

NS5/NS8/NS10/NS12/NS15

Series	NS5-V2	NS8-V2	NS10-V2	NS12-V2	NS15-V2
Rated power supply voltage	24 VDC				
Allowable voltage range	20.4 to 27.6 VDC (24 VDC \pm 15%)				
Power consumption	15 W max.	25 W max.			45 W max.
Ambient operating temperature	0 to 50 °C (See note on the next page.) Note: The ambient operating temperature is subject to the following restrictions according to the mounting angle. Mounting angle of 0 to 30° to the horizontal: • When no Expansion Units are mounted, the operating temperature range is 0 to 45°C. • When a Video Input Unit or a Controller Link Interface Unit is mounted, the ambient operating temperature is 0 to 35°C. Mounting angle of 30 to 90° to the horizontal: Operating temperature range of 0 to 50°C				
Storage temperature	-20 to 60 °C *1				
Ambient operating humidity	35 to 85% (0 to 40 °C), 35 to 60% (40 to 50 °C) (with no condensation)				
Operating environment	No corrosive gases.				
Noise immunity	Conforms to IEC61000-4-4, 2 kV (power lines).				
Vibration resistance (during operation)	10 to 57 Hz, 0.075 mm amplitude, 57 to 150 Hz, 9.8 m/s ² 30 min each in X, Y, and Z directions				5 to 8.4 Hz, 3.5 mm single amplitude, 8.4 to 150 Hz, 9.8 m/s ² 10 min times each in X, Y, and Z directions
Shock resistance (during operation)	147 m/s ² 3 times each in direction of X, Y, and Z				
Weight	1.0 kg max.	2.0 kg max.	2.3 kg max.	2.5 kg max.	4.2 kg max.
Degree of protection	Front operating panel: Equivalent to IP65 oil-proof type and NEMA4 UL type 4. *2 Note: May not be applicable in locations with long-term exposure to oil.				
Ground	Ground to 100 Ω or less.				
Battery life	5 years (at 25 °C): Replace battery within 5 days after the battery runs low (indicator lights orange).				
Applicable standards	Certified for conformance to UL 508, UL 1604, EMC Directive, NK, and LR Standards.				

*1. Operate the PT within the temperature and humidity ranges shown in the right diagram.

*2. Support for NS5, NS10, NS12 and NS15.

NSH5 Hand-held PT

Series	NSH5-V2	
Type	5.7-inch Color TFT (Hand-held Version)	
Case color	Black	
Built-in Ethernet port	No	
Model	NSH5-SQR10B-V2 (Emergency stop button: Red)	NSH5-SQG10B-V2 (Stop button: Gray)
Rated power supply voltage	24 VDC	
Allowable voltage range	20.4 to 27.6 VDC (24 VDC \pm 15%)	
Power consumption	10 W max.	
Ambient operating temperature	0 to 40°C	
Storage temperature	-20 to 60°C	
Ambient operating humidity	35% to 85% (0 to 40°C) with no condensation	
Operating environment	No corrosive gases.	
Noise immunity	Common mode: 1,000 Vp-p (between power supply terminals and panel) Normal mode: 300 Vp-p Pulse width: 100 ns to 1 μ s, Rise time: 1-ns pulse	
Vibration resistance (during operation)	10 to 57 Hz, 0.075 mm amplitude, 57 to 150 Hz, 9.8 m/s ² 30 min each in X, Y, and Z directions	
Shock resistance (during operation)	147 m/s ² 3 times each in direction of X, Y, and Z	
Weight	1 kg max.	
Degree of protection	Equivalent to IP65.	
Ground	Ground to 100 Ω or less.	
Battery life	5 years (at 25°C): Replace battery within 5 days after the battery runs low (indicator lights orange).	
Applicable standards	Certified for conformance to UL 508, EMC Directive, and EN 60204-1.

Backlight *2	Service life *3	50,000 hours min.				75,000 hours min.							
	Brightness adjustment	There are 3 levels that can be set with the touch panel. *4				Three-level or 32-level brightness adjustment from the touch panel screen. *5							
	Backlight error detection *6	Error is detected automatically, and the RUN indicator flashes green as notification.											
Touch panel (matrix type)	Method	Matrix resistive membrane											
	Number of switches/resolution	300 (20 horizontal × 15 vertical) 16 × 16 dots for each switch											
	Input	Pressure-sensitive											
	Service life	1,000,000 touch operations.											
Display text	Labels	Can be specified in CX-Designer. Font, style, and size can be specified.											
	Numerals, alarms, and character strings	Scalable Gothic: Magnification: 6 to 255 points Rough: Magnification: 1×1, 1×2, 2×1, 2×2, 3×3, 4×4, 8×8 Standard: Magnification: 1×1, 1×2, 2×1, 2×2, 3×3, 4×4, 8×8 Fine: Magnification: 1×1, 1×2, 2×1, 2×2, 3×3, 4×4, 8×8 7-segment display: Can display only numerals, dates, and times.											
	Supported languages (42 languages)	Scalable Gothic, rough, standard, and fine can be used for 42 languages. Japanese, simplified Chinese, traditional Chinese, Korean, English, French, German, Italian, Portuguese, Spain, Swedish, Dutch, Finnish, Norwegian, Basque, Catalan, Danish, Albanian, Croatian, Czech, Hungarian, Polish, Romanian, Slovak, Slovenian, Bulgarian, Belarusian, Russian, Serbian, Macedonian, Ukrainian, Georgian, Icelandic, Afrikaans, Faroese, Indonesian, Greek, Turkish, Estonian, Latvian, Lithuanian, Thai (supported only with scalable Gothic font)											
Text attributes	Color	Monochrome, 16 gradations				256 colors							
	Font style (only when vector font is specified)	Bold or italic											
	Vertical alignment	Top, center, or bottom											
	Horizontal alignment	Left-justified, centered, or right-justified											
Flicker	Objects supporting flicker	Functional objects: Select from up to 10 types of registered flicker settings. The flicker speed and flicker range can be set. Fixed objects: Select from three flicker types.											
Numeral units and scale settings	1,000 max.												
Alarm/event settings	5,000 max.												
Expansion interface	For Expansion Interface Units												

*1. NS5-TQ series (high luminance TFT) luminance is better than that of NS5-SQ series by about 110 cd/m².

*2. Contact your nearest OMRON representative to replace the backlight.

*3. This is the estimated time before brightness is reduced by half at room temperature and humidity. It is not a guaranteed value.

The service life will be dramatically shortened if PT is used at low temperatures. For example, using the PT at temperatures of 0°C will reduce the service life to approximately 10,000 hours (reference value).

*4. The brightness cannot be adjusted much.

*5. Lot No. 15Z0 or later of NS5 models.

*6. This function does not indicate that the service life has been reached. It detects when the backlight is not lit due to a disconnection or other errors.

Backlight error detection indicates that all backlights (2) are OFF.

	Vertical alignment	Top, center, or bottom													
	Horizontal alignment	Left-justified, centered, or right-justified													
Flicker	Objects supporting flicker	Functional objects: Select from up to 10 types of registered flicker settings. The flicker speed and flicker range can be set. Fixed objects: Select from three flicker types.													
Numeral units and scale settings	1,000 max.														
Alarm/event settings	5,000 max.														
Expansion interface	For Expansion Interface Units														

*1. Contact your nearest OMRON representative to replace the backlight.

*2. This is the estimated time before brightness is reduced by half at room temperature and humidity. It is not a guaranteed value.

The service life will be dramatically shortened if PT is used at low temperatures. For example, using the PT at temperatures of 0 °C will reduce the service life to approximately 10,000 hours (reference value).

*3. Lot No. 28X1 or later of NS8 models, Lot No. 11Y1 or later of NS10 models, Lot No. 14Z1 or later of NS12 models.

*4. This function does not indicate that the service life has been reached. It detects when the backlight is not lit due to a disconnection or other errors. Backlight error detection indicates that all backlights (2) are OFF.

*5. An analog touch panel is used with the NS15. Do not press the touch panel in two or more places simultaneously.

If the touch panel is pressed in two or more places simultaneously, it may activate a switch between the points that are pressed.

Communications

NS5/NS8/NS10/NS12/NS15

Memory Card		Interface	One ATA-Compact Flash interface slot
		Functions	Used to transfer and store screen data, store logging data, and store history data. (Alarm/Event History, Operation Log, and Error Log generated during Macro execution).
Serial Communications	Port A	Connector	Conforms to EIA RS-232C. D-Sub female 9-pin connector 5-V output (250 mA max.) through pin 6. The 5-V outputs of serial ports A and B cannot be used at the same time.
		Functions	Host (PLC) access: 1:N NT Links (connections with CS/CJ/CP-series PLCs and C200HX/HG/HE(-Z) PLCs), 1:1 NT Links, or Host Link (connections with C Series or CVM1/CV-series PLCs) Direct access to Temperature Controllers using Smart Active Parts: CompoWay / F and bar code reader connections (Read directly from display.)
	Port B	Connector	Conforms to EIA RS-232C. D-Sub female 9-pin connector. 5-V output (250 mA max.) through pin 6. The 5-V outputs of serial ports A and B cannot be used at the same time.
		Functions	Host (PLC) access: 1:N NT Links (connections with CS/CJ/CP-series PLCs and C200HX/HG/HE(-Z) PLCs) or 1:1 NT Links (connections with C Series or CVM1/CV-series PLCs) Direct access to Temperature Controllers using Smart Active Parts: CompoWay / F and bar code reader connections (Read directly from display.)
USB SLAVE Specifications		USB rating	USB1.1
		Connector	TYPE-B (Slave)
		Functions	Connection with the CX-Designer (for screen data transfers) Connecting to a PictBridge-compatible Printer Recommended printers: EPSON: PM-G4500, PX-G5300, PX-5600, EP-901F Canon: PIXUS MX7600, PIXUS iP100, PIXUS iX5000
USB HOST Specifications *1		USB rating	USB1.1
		Connector	TYPE-A (Host)
		Functions	Connection with a printer (for hard copies) Recommended printers: EPSON: PX-G930
Built-in Ethernet Specifications *2		Conformance standards	Conforms to IEEE 802.3/Ethernet (10 Base-T/100 Base-TX).
		Functions	Host (PLC) access and connection with the CX-Designer (for screen data transfers)
Controller Link (Wired-type) Specifications *3		Baud rate	2 M/1 M/500 K bps
		Transmission path	Shielded twisted-pair cable (special cable)
		Functions	Host (PLC) access and data links
Video Input Specifications *4		Resolution	NS-CA001: 320×240, 640×480, 800×600 dots NS-CA002: User-defined size
		Input signal	NS-CA001: NTSC composite video or PAL NS-CA002: NTSC composite video or PAL
		Number of video inputs	NS-CA001: Number of cameras: 4 max. NS-CA002: 2 cameras + RGB

*1. Except NS5.

*2. NS□-□□□1-V2 only.

*3. Except NS5 and NS8.

*4. Except NS5 and NS15. NS15 provides RGB input. (NS-CA002)

*1. To connect a NS with a PLC via a RS-422A connection, OMRON's NS-AL002, or CJ1W-CIF11 RS-232C/RS-422A Converter can be used to convert the RS-232C port on the NS to RS-422A.

*2. A NS with Ethernet port is necessary.

When connecting a PLC with the NS, an Ethernet port is necessary on the PLC, too. Use a PLC CPU Unit with a built-in Ethernet port, or add an Ethernet Unit.

*3. A NS with Ethernet port is necessary.

When connecting a PLC with the NS, an EtherNet/IP port is necessary on the PLC, too. Use a PLC CPU Unit with a built-in EtherNet/IP port, or add an EtherNet/IP Unit.

*4. Install a Controller Link Interface Unit on the NS. A Controller Link Unit is necessary for the PLC.

*5. Mount a Serial Communications Unit on the NJ-series Controller. A NS can access only to the Controller's memory used for CJ-series unit.

*1. The SPMA relaying a PLC is not supported.

*2. Only Device Monitor function is supported. Monitoring function that uses tags (variables) is not supported.

*3. The SAP for CJ-series Special I/O Units and CPU Bus Units that can be used with NJ-series Controller is supported.

Connectable Inverters

Series	Communication Unit	Connection	
3G3MX2	(Use the RS-485 terminal on the Inverter)	RS-485 (2-wire)	1:N
3G3JX	(Use the RS-485 connector on the Inverter)		
3G3RX	(Use the RS-485 terminal on the Inverter)		

Connectable Temperature Controllers

The following Temperature Controllers can be connected directly to an NS-series PT*.

Unit name	Series	Model	Remarks
Modular Temperature Controller	EJ1	EJ1-EDU End Unit	
Modular Temperature Controller	E5ZN	E5ZN-SCT24S Terminal Unit	
Digital Controller	E5AR	E5AR-□□□□□□□□□□-FLK	
	E5ER	E5ER-□□□□□□□□□□-FLK	
Temperature Controller (Digital Controller)	E5AN/E5EN/E5CN (Basic Model)	E5CN-□□□□□□T-FLK Multi-input (Thermocouple/Resistance Thermometer) Type	SAP screens are available.
		E5CN-□□□□□□L-FLK Analog Input Type

*1. To connect using RS-422A/485, an RS-232C/422A converter (e.g. NS-AL002, CJ1W-CIF11) is required.

*2. To connect using RS-485, an RS-232C/422A converter (e.g. NS-AL002, CJ1W-CIF11) is required.

Up to 32 sequencers can be connected when using RS-485.

Read and Understand this Catalog

Please read and understand this catalog before purchasing the product. Please consult your OMRON representative if you have any questions or comments.

Warranty and Limitations of Liability

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

Application Considerations

SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of the product in the customer's application or use of the product.

Take all necessary steps to determine the suitability of the product for the systems, machines, and equipment with which it will be used.

Know and observe all prohibitions of use applicable to this product.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

Disclaimers

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons. Consult with your OMRON representative at any time to confirm actual specifications of purchased product.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

Note: Do not use this document to operate the Unit.
