

for a greener tomorrow

iQ WORKS2

The Integrated Industrial Software Solution

- Seamless engineering environment
- Design, program and maintain all Mitsubishi automation solutions
- Significantly reduce engineering time and costs

SOFTWARE DESIGNED TO MAKE ENGINEERING EASIER

MELSOFT iQ Works2 is an engineering management software solution that integrates the various programming, design and maintenance software applications for Mitsubishi Electric's automation platform. The result is one seamless engineering environment.

iQ WORKS SOFTWARE SUPPORTS:

GOT HMI series
MELSEC Compact PLC Series
MELSEC Modular PLC Series
Motion Controllers
MELFA Robots
MELSERVO Servo Amplifier
FREQROL Inverter Drives

SOFTWARE RANGE

iQ WORKS2

Is the integrated engineering software suite which includes Navigator2, GX Works3, GX Works2, MT Works2, GT Works3 and RT Tool Box2 Sim.

MELSOFT NAVIGATOR2

The Navigator is the heart of iQ Works2. It enables the effortless design of entire upper-level systems and seamlessly integrates the other MELSOFT programs included with iQ Works.

GX WORKS3

GX Works3 is the latest generation of programming and maintenance software offered by Mitsubishi Electric specifically designed for the MELSEC iQ-R and iQ-F Series control systems. It includes many new features such as graphic-based system configuration, integrated motion control setup, multiple language support, providing an intuitive engineering environment solution.

MT WORKS2

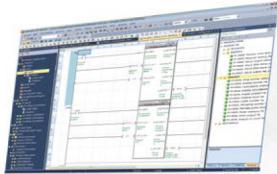

MT Works2 is a comprehensive motion CPU maintenance and program design tool. It has many useful functions, such as intuitive settings, graphical programming, digital oscilloscope, simulator and assistance help.

GT WORKS3

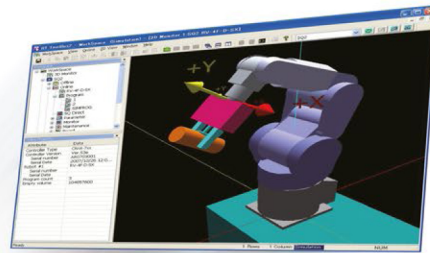

This is a complete HMI programming, screen creation and maintenance program for GOTs. The software's functionality has been built around the concepts of ease of use, simplification, elegance in design and screen graphics.

RT TOOLBOX2

RT Toolbox2 is the programming environment for all Mitsubishi MELFA robots. It enables you to create programs in minutes using the MELFA BASIC V robot language. After testing and optimisation it then just takes a couple of mouse clicks to transfer the programs to the robot.

Programmable Controller Project
