Programmable Controller MELSEC iO F

MELSEC IQ-E EX5-CCL-MS

Hardware Manual

JY997D73501

June 2017

This manual describes the part names, dimensions, installation, and specifications of the product. Before use, read this manual and manuals of relevant products fully to acquire proficiency in handling and operating the product Make sure to learn all the product information safety information and precautions

And, store this manual in a safe place so that you can take it out and read it whenever necessary. Always forward it to the end user

Registration: Phillips is a registered trademark of Phillips Screw Company. The company name and the product name to be described in this manual are the registered trademarks or trademarks of each company.

Effective June 2017

Specifications are subject to change without notice

Safety Precautions (Read these precautions before use.)

This manual classifies the safety precautions into two categories:

AWARNING and ACAUTION

Indicates that incorrect handling may cause hazardous conditions, resulting in death or severe injury.
Indicates that incorrect handling may cause hazardous conditions, resulting in minor or moderate injury or property damage.

Depending on the circumstances, procedures indicated by ACAUTION may also cause severe injury.

It is important to follow all precautions for personal safety.

Associated Manual

Manual name	Manual No.	Description
MELSEC iQ-F FX5 User's Manual (CC-Link)	SH-081793ENG	Describes the functions of the CC-Link system master/intelligent device module.
MELSEC iQ-F FX5U User's Manual (Hardware)	JY997D55301	Explains FX5U CPU module specification details for I/O, wiring, installation, and maintenance.
MELSEC iQ-F FX5UC User's Manual (Hardware)	JY997D61401	Explains FX5UC CPU module specification details for I/O, wiring, installation, and maintenance.

How to obtain manuals

For the necessary product manuals or documents, consult with your local Mitsubishi Electric representative.

Applicable standards

FX5-CCL-MS complies with the EC Directive (EMC Directive) and UL standards (UL, cUL)*1. Further information can be found in the following manual.

→ MELSEC iQ-F FX5 User's Manual (CC-Link)

Regarding the standards that relate to the CPU module, please refer to either the product catalog or consult with your local Mitsubishi Electric representative

*1 FX5-CCI -MS modules manufactured in June 2017 or later (manufacturer's serial number: 1760001) comply with the UL standards (UL, cUL). Attention

This product is designed for use in industrial applications.

MASS (Weight): Approx. 0.3 kg Outer painting color: Munsell 0.6B7.6/0.2

2 Installation

Ζ.	Installation	
IN PI	ISTALLATION RECAUTIONS	
•	Make sure to cut installation or wiri Failure to do so n Use the product User's Manual (H Never use the pro corrosive gas (s impacts, or expos If the product is deterioration or di	off all phases of the power supply externally before attempti g work. ay cause electric shock or damage to the product. within the generic environment specifications described in th rdware) of the CPU module to be used. duct in areas with excessive dust, oily smoke, conductive dus it air, CL, H2S, SO2 or NO2), flammable gas, vibration it to high temperature, condensation, or rain and wind. used in such conditions, electric shock, fire, malfunction mage may occur.

INSTALLATION **ACAUTION** PRECAUTIONS

Do not touch the conductive parts of the product directly

- Doing so may cause device failures or malfunctions
- When drilling screw holes or wiring, make sure that cutting and wiring debri do not enter the ventilation slits of the PLC Failure to do so may cause fire, equipment failures or malfunctions.
- The dust proof sheet should be affixed to the ventilation slits before installation and wiring work to block foreign objects such as cutting and wiring debris However when the installation work is completed, make sure to remove the sheet to provide adequate ventilation
- Failure to do so may cause fire, equipment failures or malfunctions. Install the product on a flat surface.
- If the mounting surface is rough, undue force will be applied to the PC board thereby causing nonconformities
- Install the product securely using a DIN rail or mounting screws.
- Connect the extension cables securely to their designated connectors. Loose connections may cause malfunctions.

For further information on mounting, refer to the following manual. → MELSEC iQ-E EX5U User's Manual (Hardware) → MELSEC iQ-F FX5UC User's Manual (Hardware)

3. Wiring

WIRING PRECAUTIONS WARNING

- Make sure to cut off all phases of the power supply externally before attempting installation or wiring work.
- Failure to do so may cause electric shock or damage to the product. Make sure to attach the terminal cover, provided as an accessory, before
- turning on the power or initiating operation after installation or wiring work. Failure to do so may cause electric shock
- Make sure to wire the screw terminal block in accordance with the followin precautions
- . Failure to do so may cause electric shock, equipment failures, a short-circuit wire breakage malfunctions or damage to the product
- The disposal size of the cable end should follow the dimensions described in the manual
- Tightening torgue should follow the specifications in the manual.
- Tighten the screws using a Phillips-head screwdriver No.2 (shaft diameter 6 mm or less). Make sure that the screwdriver does not touch the partition part of the terminal block

WIRING PRECAUTIONS

 Install module so that excessive force will not be applied to terminal blocks. Failure to do so may result in wire damage/breakage or PLC failure.

- Make sure to observe the following precautions in order to prevent an damage to the machinery or accidents due to malfunction of the PLC caused by abnormal data written to the PLC due to the effects of noise:
- Do not bundle the power line and communication cables together with or lay them close to the main circuit, high-voltage line, load line or power line. As a guideline, lay the power line, control line and communication cables at least 100 mm away from the main circuit, high-voltage line, load line or power line.
- Ground the shield of the shielded wire or shielded cable at one point on the PLC. However, do not use common grounding with heavy electrical systems

3.1 Applicable Cable

3.1.1 CC-Link connection terminal block

1) Suitable wiring

Diameter	Туре	Material	Temperature rating
AWG 22 to 16	Strand wire	Copper wire	75°C or more

2) Wire end treatment and tightening torque The size of the terminal screws is M3. The end disposal of the cable shows below Tighten the terminal to a torque of 0.42 to 0.58 Nom. Do not tighten terminal screws with a torque outside the above-mentioned range. Failure to do so may cause equipment failures or malfunctions When one wire is connected to one terminal

VA 1 J.S.T.MFG.CO., LTD. FV1.25-B3A UL Listed (J.S.T.MFG.CO.,LTD.)

3.2 CC-Link Wiring

3.3 Power Connector

For further information on the power supply wiring and power cable, refer to the following manual

→ MELSEC iQ-F FX5 User's Manual (CC-Link)

3.4 Grounding

Ground the PLC as stated below.

- Perform class D grounding. (Grounding resistance: 100 Ω or less) · Ground the PLC independently if possible.
- If the PLC cannot be grounded independently, perform the "Shared grounding" shown below

· Bring the grounding point close to the PLC as much as possible so that the ground cable can be shortened.

4. Specification

DESIGN PRECAUTIONS	

Make sure to set up the following safety circuits outside the PLC to ensure safety system operation even during external power supply problems or PLC failure Otherwise malfunctions may cause serious accidents

- Most importantly, set up the following: an emergency stop circuit, a protection circuit an interlock circuit for opposite movements (such as normal vs. reverse rotation) and an interlock circuit (to prevent damage to the equipment at the upper and lower positioning limits)
- Note that when the CPU module detects an error, such as a watchdog timer error, during self-diagnosis, all outputs are turned off. Also, when an error that cannot be detected by the CPLI module occurs in an input/output control block output control may be disabled
- External circuits and mechanisms should be designed to ensure safe machinery operation in such a case.
- For the operating status of each station after a communication failure refer to manuals relevant to the network. Incorrect output or malfunction due to a communication failure may result in an accident.
- Construct an interlock circuit in the program so that the whole system always operates on the safe side before executing the control (for data change) of the PLC in operation. Read the manual thoroughly and ensure complete safety before executing other controls (for program change, parameter change, forcible output and operation status change) of the PLC in operation. Otherwise, the machine may be damaged and accidents may occur due to erroneous operations.
- Especially, when a remote programmable controller is controlled by an external device, immediate action cannot be taken if a problem occurs in the programmable controller due to a communication failure. To prevent this configure an interlock circuit in the program, and determine corrective actions to be taken between the external device and CPU module in case of a communication failure
- If a communication cable is disconnected, the network may be unstable, resulting in a communication failure of multiple stations. Configure an interlock circuit in the program to ensure that the entire system will always operate safely even i communications fail. Failure to do so may result in an accident due to an incorrect output or malfunction
- To maintain the safety of the programmable controller system against unauthorized access from external devices via the network, take appropriate measures. To maintain the safety against unauthorized access via the Internet take measures such as installing a firewall

DESIGN PRECAUTIONS							
Simultaneously turn o extension modules.	n and off the power supplies of the CPU module and						
STARTUP AND MAINTENANCE PRECAUTIONS							
 Do not disassemble or modify the PLC. Doing so may cause fire, equipment failures, or malfunctions. For repair, contact your local Mitsubishi Electric representative. Do not drop the product or exert strong impact to it. Doing so may cause damage. 							
DISPOSAL PRECAUTIONS							
Please contact a certified electronic waste disposal company for the environmentally safe recycling and disposal of your device.							
 The product is a precision instrument. During transportation, avoid impacts larger than those specified in the general specifications by using dedicated packaging boxes and shock-absorbing palettes. Failure to do so may cause failures in the product. After transportation, verify operation of the product and check for damage of the mounting part, etc.

Warranty

۳

Exclusion of loss in opportunity and secondary loss from warranty liability Regardless of the gratis warranty term. Mitsuhishi shall not be liable for compensation to: (1) Damages caused by any cause found not to be the responsibility of Mitsubishi. (2) Loss in opportunity, lost profits incurred to the user by Failures of Mitsubishi products. (3) Special damages and secondary damages whether foreseeable or not, compensation for accidents, and compensation for damages to products other than Mitsubishi products.

(4) Replacement by the user, maintenance of on-site equipment, start-up test run and other tasks.

A For safe use

This product has been manufactured as a general-purpose part for general industries, and has not been designed or manufactured to be incorporated in a device or system used in purposes related to human life. Before using the product for special purposes such as nuclear power, electric

power, aerospace, medicine or passenger movement vehicles, consult with Mitsubishi Electric.

This product has been manufactured under strict quality control. However when installing the product where major accidents or losses could occur if the product fails, install appropriate backup or failsafe functions in the system.
